From 14 October 1957 onwards 15 October 1957

Question 1, October 14, 1957

Ye Songbai: There is no contradiction between anti-right struggle and revelation. During the revelation, some right-wing elements take the party's chance to rectify the party. If you don't strike him, the middlemen will be taken prisoner to clean up their ideas, analyze them correctly and incorrectly, the party is very humble, absorb opinions to do reference, and the party put good **Malice** put in front of the masses to discuss the right **Strike**, otherwise it will not be possible to wind, the right will not set fire to polarize activists everywhere, so I think it is very correct and there is no contradiction. The party has had experience with right-wing elements for several months. It is not based on a few words or right-wing elements, according to Chairman Mao's eight items Criteria, the favorable party will be liberated, the unfavorable party will not let it go, it should also put talents Help the party to rectify.

Wei Zhiyi: The current nationwide anti-right struggle and the organs and mines carry out a full wedge. These two are no contradictions. These two are no contradictions. This is the struggle of our Party against the idea of financing. Rightists wanted to overthrow the party's leadership against the party's goal. The way to lead the party to the Guangming Road Party has deepened the hearts of the people, 600 million people. It is necessary to carry out relentless against the right, so it is necessary to defame the party by the people. The purpose of the struggle, the liberation is to rectify the shortcomings and improve the work, the whole wind movement has been vigorously carried out. Regardless of that unit, the communist relations have been unharmonious, this is the most democratic, solve problems quickly in the revelation, so I think these two movements are not only contradictory but also timely necessary. of.

YUAN **Anren**: Rightists stand on the reactionary position of capitalist opposition against the people, don't want the leadership of the party, are **counteracting** so it is necessary to fight against him firmly, so it is necessary to fight against him in order to improve his work. Therefore, there is no contradiction between him and the two.

Shen Zhuyao: China has made great achievements in the years since the beginning of the revolution since its founding, especially since last year, but due to victory, the Party has also fostered a part of the capitalist ideology, which is three, which is detrimental to socialist construction. Chairman Mao's instructions are very clear that because of the three major principles, there is some contradiction between the upper building and the economic base of the party group relationship, so it is not conducive to socialist construction. Therefore, it is not conducive to socialist construction. Therefore, it is conducive to the Party's winds, and to reconcile the relationship between the leadership and the leadership, so The sound is better and better better for work. Therefore, it is good that the right-wing elements are rare in the country. They are not conducive to socialism and are not conducive to the leadership of the Party. He has been completely since liberation. Therefore, they have always thought that they have always thought to disrupt this whole wind. They think it is a good opportunity for anti-party anti-socialism, and when it comes back to the end. Dynamics to fish mixed beads, To overthrow the party's leadership undermines socialism and want to revive capitalism. For example, the chapter states that it is not exploitative, and he also wants to pull the business community to deny that the business sector does not transform and disrupt during the resignation, so they are detrimental to socialism. There is a difference between the two nature. In order to liberate favorable development, the right elements will have to be fought in depth, so he two are There is no contradiction. So it still needs to be liberated, and there are right-wing elements who still want to fight.

Chu Qingchu:

I think there is no contradiction between the fight against the right and the liberation. It plays positive factors and is conducive to socialist construction. Its purpose is good for socialism. The anti-right struggle is to consolidate the socialist construction, because rightists, oppose socialist construction, stand by The capitalist position exploits the people, so there is no contradiction between opposing right-wing elements and him to fight resolutely.

Dong Yi-Ping:

The right has historical roots, and there are two problems in the revelation that are not necessarily right, so everyone should try to play out their opinions.

Wang Shuo-Zhi

Chairman Mao proposed that it is also a solution to socialism, but right-wing activists are not in trouble. We say that there is no contradiction between anti-right struggles and liberation. Eight years of liberation, the democratic system of the people has been consolidated and cannot be destroyed, and it is considered empty in the revelation, which attracts middle chaos. In the fight against the right, there is no influence on us. To fight

against the right-wing anti-party speech, after all, it is to improve the work, and the contradictions are normalized. In fact, there is no contradiction between these two movements.

Yin Qianqing

The Party carried out the all-party rectification campaign and asked the people across the country to help the Party to rectify, carry out some of these right-wing activists, take advantage of the party's opportunity to rectify the winding, and negate the achievements of the Party's policies over the past few years, so it had to fight against the right, and put the truth out of the truth that the right-wing elements had fallen, and the party was winning. Li will continue to carry out a sounding wind and good socialist cause still need to be great Ming magnified, we get a lot of harvest, the meaning of the whole wind is quite significant.

Jiang Kaixin:

It is to put an end to the party, clear the three major principles, and when right-wing elements use it to organize a plan to restore the capitalist system to attack the anti-party anti-socialist system, so to counter the right-wing elements, we need to use a good-will attitude to help the party to improve its shortcomings in its work.

ZHANG GERU:

The goals of these two movements are the same. The anti-right struggle is for socialism, but also for socialism. It calls on outside the party to show up and make valuable opinions. In order to overcome the three major style of work, the right-wing elements stand on capitalist stance to overthrow socialism and want to revive capitalism. So we're going to fight against the right. Decisively defeated, so there is no contradiction between anti-right struggles and liberation. The right-wing elements have historical roots. Neither Zhang Luo, nor the cautious one day, they are still to improve the work of socialism. As long as the opinions are correct, they are not all right-wing elements.

Pan Shaohong:

The fight against the right is not contradictory. The right-wing elements are organized and planned. He took the opportunity to attack the party in an attempt to overthrow the party's leadership, and the right in liberation of our socialist construction cause for several years criticized this achievement. The party had to strike back on the right, because it was about two road issues. The right-wing elements wanted to restore the capital. Most people are going to build socialism, the wind does not appear and put, and the song and put are to be beneficial to society Since the liberation of the three, we have

to overcome the three major principles, improve mistakes, and help leaders improve their work style.

Li Feng:

There is no contradiction between anti-right struggles and liberation, and anti-right struggle is necessary because we private business and businessmen, for 52 years have been largely done in economic transformation, political ideological reconstruction has been completed, the right-wing stand on capitalist positions, leveraging the party's wind, distorting and fabricating facts Party attack, this vandalism Socialist construction affects our enthusiasm in building the socialist path. Most people have learned, but there are people who have not learned, you and I have been affected by them in some ways, surely there is such a speech that is detrimental to the cause of socialist construction. We must firmly fight against him. It is advantageous to make correct opinions in good faith, and it is advantageous to socialist construction. Chairman Mao has proposed six standards that people's speech is free and that the speech of the people is disciplined. It must be conducive to the cause of socialist construction, and it is necessary to help and support the Party's rectitude, so that right-wing struggles are not allowed to distort the facts.

Yu Changhan:

The achievements made by liberation are certainly in keeping with the wishes of the people, and Chairman Mao raised internal contradictions as resolving internal problems. The rightists are reluctant to give up the idea of reviving capitalist ideas. Therefore, he has organized and planned attacks against the Party to destroy party relations, defame the party's policy, and usurp the party's leadership. Therefore, it cannot fail to fight back, the struggle is necessary, the struggle has an impact on the people, and it has an impact on the advancement of the country, and it is good will to overcome the three major doctrines and improve the cause work. Improving the relationship between leadership and being led and building socialism at an early date, let's not say a word about the right, right It is still to be revealed for a long time.

Pan Luguang:

In the past few years, Chairman Mao has made some achievements in his work, proposing to let the rightists and falsify the facts by using this time to distort the facts. For the sake of caution, they are also like this. We want to strike against him. We want to make a blow on him. We want to reinvent our thinking, and the municipal committee said this study will transform us. It is timely.

Zhou Weiyin:

I think that no contradictions are conducive to socialist construction. The achievements are positive. Chairman Mao's fears of problems in his work is to solidify the cause of socialist construction. Rightists attack the party through the opportunity of good winds. They are not willing to take the socialist road, and they are dissatisfied with the rehabilitation of capital. The path of the doctrine. Caution was reluctant to accept socialist transformation, they always wanted to oppose socialism, so it was necessary, and after revealing the ambitions of the right-wing, began to think that it was planned to embed the fact that they did not see the right.

Hu Ping:

Anti-right and liberation are two inseparable components. The movement of the anti-right struggle continues normally. The movement of the anti-right struggle is closely key. That is, the anti-right struggle and anti-right struggle will not hinder the revelation, anti-right struggle and magnification are two things. Chairman Mao leads us by achieving by Major victory, internal contradictions of the people, due to socialist development accounted for The main position, so the whole wind is to overcome the shortcomings in the work and the three major doctrines. The right side also uses the opportunity of the whole wind to attack the party in this way. This is not a sweeping, reversing black and white, and there is no contradiction with the wind is two things. The right-wing movement was in the right, the right-wing is the enemy and the contradictions within the people are intrinsically different. His arguments are hostile to the party at any time, and it is not the same as businessmen who say wrong words. To see whether his speech was a negative standard, the anti-right struggle was necessary and timely. In the whole wind, too, we are also engaged in anti-right struggles. We are concerned about participating in the whole wind movement with a positive attitude. Today, the wind is not looking for the right, the aim is to break the capitalist position if it is the right, we will unwavering fight against the right.

The second question

Zhou Weiyin: It is totally wrong to build socialism without party leaders. The overall purchase and sale is a bad thing. This is completely not the fact. The construction of Anqing municipal construction is not like this, in the past, is the reactionary government like this, the achievements are certain, have the East District factory in the past been unsound, before liberation, flood control dams, how much damage was the water before, the country's wealth and the property of the people in five or four years Without a flood control dam, the Party relies on the people to overcome the floods, if not the Party people could have rice to eat! In the Republic of China's 20 years of great water eating potatoes, the Wuhan Bridge is the world's first big joyful event, if socialism is not going to work!

Rightists are reluctant to take the socialist road to disinformation that no party leadership can build China. We have no party leadership to build anything.

Li Xihou: I said that no socialism can be built without party leadership, and the other parties of the revolution will not work. This is certain. Only the party leadership can overthrow the reactionary ruling class, lead the people towards socialism, and gradually eliminate capitalist exploitation. All 600 million people are liberated. No party or person has This power. It is not possible to have these achievements without the party leadership. Wuhan Bridge, my son's daughter-in-law worked in Wuhan Bridge. The Wuhan Bridge has not been successful since history. When the Kuomintang has this plan, it cannot be realized at all. Only the party leaders can do it with the help of Soviet experts. My son wrote to tell me I went to see, without this opportunity, this is not only the first bridge in China, but also in the world. One of the bridges, countries around the world have repeatedly praised the leadership of the Communist Party, which is a real example of only 14 buses before the liberation of Wuhan, which has now increased to 20 times. Strong support for the Communist Party leadership... If someone says that socialism can be built without Communist leadership, I think it is absolutely wrong that only the Communist Party can transform capitalists into self-sustaining laborers through a peaceful path.

Wang Shuozi: Before liberation was a semi-feudal semi-colonial country, taking the path of capitalism is to get rich for individuals. It simply cannot talk about construction. After the victory of the resistance, we will first build a large prison to catch people, simply cannot be said to build, the factory is a repair plant that has no manufacturing plant at all, and the post-liberation socialist system is in line with wide For the interests of the big people, the first five plan is only a few months before the municipal committee has reported Completed ahead of time, there are hundreds of kinds that could not be manufactured in the past, industrial speed is the first in the world, automobiles can also be manufactured, in the past imitation machines, projects are not bought and exported, aircraft we can also build, through construction to consolidate an international happy life free from aggression. This is all the Communist Party of China Why can't you do it in the past! This is the fundamental difference between the two social systems. It is the correct leadership of the Communist Party. In the past, Anqing Dongmen was a vegetable field, and now many factories have been built in Anqing. Anqing also has a sugar factory. First, there is socialist construction without party leadership.

Chu Qingchu:

This sentence is completely incorrect. The history of Dr Sun Yat-sen's leadership of old Chinese nationalism failed. It is the October revolution that Sun Yat-sen had hope, proposed that the Russian-Russian Communist Party Chiang Kai-shek lead the revolution, become an empire dog, make China a semi-feudal semi-colony, and it is also

the leader of the Communist Party to achieve reform. In order to build socialism, the Communist Party is the unselfless liberation of life. Humanity, can socialism be done well, and the Party can build socialism? If only profit is made, corruption is rich, and bad things are done, so to build a society must lead the Communist Party, and socialism must be built for the happiness of the people, and businessmen who want to patriotism must love the leadership of the Socialist Communist Party.

Wei Zhiyi:

Socialism has deepened the hearts and minds of the people across the country, and the rightists are attempting to oppose the leadership of the Communist Party. It is impossible to build socialism without the Communist Party. The basic element of socialism is the public ownership system of production materials. It is basically different from the capitalist system, there is no exploitation and poverty. Only the Communist Party does and leads it. Capitalist political parties are protecting the interests of bourgeois groups, and building socialism is only dependent on party leadership to transform private ownership in order to eliminate exploitation. Because they start different. The Democratic Republican Party of the US imperialists is there. It is not possible to build socialism. How should we correctly understand the leadership role of the Party. In order to prosper the country, the prosperity and strength of the country, the liberation of industrial and agricultural production in the past few years have achieved brilliant achievements. All food purchases and sales have been realized. It is only under the leadership of the Communist Party of China. It is unprecedented to build China as independent and independent.

Ye Songbai:

I personally know that the people who say this is the opposition party against socialism against the people, the people are pro-party and socialist, Marxist-Leninism is all around the world. Marxist-Leninism is the main party, with the Marxinist world in order to build socialism, and the construction achievements in liberation years have been great, is led by the Communist Party. Other classes are exploiting the majority for the minority rule. Only the Communist Party, starting from the majority and building socialism, is the Communist Party leader Anqing. In 1931, Anqing was gone from the floods of Anqing, how many people were, the party leadership in May and four years borrowed the ship to save people. Comrades saved people on board for more than 40 days. Rice not only did not collect it, but also sent rice to the home. There are dozens of tons of steel in the reactionary period, now more than 10,000 tons of steel, in the first five years to 2.3 billion, and investment of more than 40 billion yuan in the second five-year plan, so there can be no socialism without the Communist Party.

Wu:

Socialist system was an ideal society in the past. If there were no contradictions between the production and development of production without exploitation and poverty, the living standards of the people continued to be improved and Lenin ideals of the October Revolution, which met the requirements of all humanity, the Communist Party of China led our revolution to achieve this society. Brilliant, I think why the Communist Party can do this! Because the Communist Party is the selfless party of working-class political parties. It has Marxianist doctrines. China is a poor and backward country. The Communist Party of China can work hard and stand hard to walk the masses line, building socialism without the leadership of the Communist Party. It is impossible to build socialism without the leadership of the Communist Party. Amid is internal contradictions to help the party and leadership improve the work to remove the three crooked winds, accelerate the realization. The right-wing elements take advantage of this opportunity to overthrow the party's leadership, which the people do not want, and it is for the party leadership, so there is no contradiction. Some people say that joint ventures are better than cooperation, and cooperation is better than doing alone. This is the position of individualism, liberalism absolute egalitarian capitalism, and we need to fight it resolutely.

Chu Anping:

After the Central Committee proposed the liberation, and then the anti-right struggle now proposed a whole wind again. In my mind it was somewhat vague. During the whole wind, Li Kangnian proposed a fixed rate for 20 years, suggesting that the fixed rate is not exploitative, and the anti-right struggle thinks it is too early to raise people? It is contradictory to think that it is with the wind. Now, like comrades, the idea is not conducive to socialist construction if they do not lay out one hundred counties through white flowers. The Party's entire leadership did not say that the three major nationalities in each of them would be detrimental to socialist construction. If we do not mention the anti-right struggle, we would have to be influenced by the right, through the anti-right being our teachers, in order to turn capitalist stance into a proletarian position. With some of the above views and ideas, Chairman Mao proposed six criteria that are clear. Great encouragement to me. If you are unfavorable to socialism in ideology and style, you say that it is also impossible to put it up. If it is positive, that is, there is nothing wrong, so I think there is no contradiction. Now, on the one hand, the task is to help the Party rectify the wind, change the three major principles, on the one hand, and also fight against the right, and have the responsibility to stand up. In the forefront of the struggle, in the past, I have only participated in two or three meetings, which shows that my right-leaning thoughts are still very serious, in the whole wind. Try to move the mind out, there are many benefits, transform themselves, mainly in the thought transformation of the past, now the future still want to put, now say inner words, help change. It is certainly not possible to build socialism without the party leadership. Our factory is rugged before the

joint venture. We cannot talk about public-private joint ventures, and we need to disassemble the government to take care of me. We have a great education in our ideological way, and the production tools are only 20 meters in area. Under that case, the joint venture, the government after the joint venture, the government after the joint venture Divided production and construction of houses, the political committee meeting in the provinces and cities only paid attention to it, explaining that the city leaders on the city The construction is important, and the factory director of the provincial political committee personally said that we have advantages and disadvantages. The benefits see that the situation can not be solved without the disadvantages to be completed. In the case of increased production savings, it is still set aside 150,000 yuan for construction.

Yuan Anren:

I think the second question is wrong. Without the Communist Party there will be no socialist construction of a socialist society. Only the Communist Party, the construction has made some brilliant achievements over the past eight years, which was achieved under reactionary destruction. Only the leadership of the party can achieve these achievements.

Li Yahou:

This theme, Joint venture and cooperation is better than single, Why is it better? The joint venture cooperation is to take the socialist road alone, play circles around the road of capitalism, stay in the idea of capitalism. The joint venture cooperation is the first step in the socialist path of businessmen. Everyone has expressed their willingness to take the socialist road to capitalism, and I want to take the material of production with practical action. The transformation of private ownership into public ownership is the first step, signifying the transformation of enterprises and the transition of exploitative class thinking to self-reliance This is a good thing, if we go back to our own hands, this path is to the road of extinction, and the unchanging position of exploitation is detrimental to socialist construction. Our joint venture and cooperation is in line with the law of social development. Second benefit, we enjoy the glory of our own labor gains, enjoy the dividends from and the danger of exploitation. I am a handicrafts cooperative, cooperation is a lot of superiority, experience better than doing alone, five or six years of cooperation to now have 46 meticulous attack and so on, the normal volume of cooperative production is increased, sales road enjoy full access to labour insurance, are politically equal in all economic terms and are normal in all aspects No other concerns, cooperation is better than doing alone.

Yuan Anren:

Cooperation is better than doing it alone, with our textile industry, in the past to give people little processing funds, small productivity of off-season funds, low prices,

exploitation and other high season home camps. After five or six years of cooperation, we earn good income. We piecemeal wages, no matter what they do before, countless families and young women are able to engage in production, as long as they do, as long as There are tools, can produce an income, life will be good, sick and enjoy labor Preservation. There are also individual difficulties with mutual assistance, so it is wrong to say that if there is no cooperation, cooperation is not done alone.

1957.10.15 PM

Ye Songbai, landowners and rich farmers said that agricultural cooperation was not good. The majority of farmers did not say this way, superiority must be good. In the past, the floods and droughts could not be solved. Now, because of collective strength, rural areas are particularly superiority for the old and the weak. No one except the right-wing anti-revolutionary elements speak bad. Cooperation in the industry can increase production, collective labor is very happy, and will not be bankrupt now.

Wei Zhiyi: I think this is not true. Since agricultural cooperation, under the leadership of the Party, production has gradually increased, the cooperation force has been great. We are now building water conservancy and improving soil improvement seeds, improving the unit area and achieving brilliant achievements. In the past, it was not possible to do it in the field of water conservancy, due to local conditions, the rice fields. Change of double season rice to increase yields, show the superiority of cooperation and resist disasters There have been significant results. In the past, it was not possible to do it alone, saying that it was the owners of wealthy farmers in general, because cooperation was detrimental to them, most poor farmers were in favor of them. With improved yields, young children did not have the opportunity to study in the past, and now, through the improvement of literacy culture, they have changed half-year brubs Half-year food situation, saying that eight out of ten cooperatives are bad, it is not true that agricultural cooperation has changed the small private sector in agriculture He has changed the old mindset. Since the end of thousands of years in China, the dispersed production has become new collective production. Farmers feel that they are not accustomed to it, saying that eight of the ten are good. We admit that there are achievements, where farmers feel not accustomed to, and most farmers support cooperatives. 56 years of anti-revolutionaries in the past Primary Agriculture Society called for higher social cooperation, so that poverty can be unplugged. In my opinion, poor farmers are all passionate about cooperation, and wealthy farmers are relatively few. The implementation of five guarantees in the countryside shows that the socialist spirit of mutual assistance and friendship is truly humanitarian. What are the problems that exist

in the countryside, in my opinion, there are still some, the first kind of labour-force is heavily burdened by many families, he was not a rich farmer, and living some difficulties. In urban areas, this is also the case with comrades of workers in urban areas, more serious in rural areas.

Zhou Weiyin: I personally say that agricultural cooperation is messing up. It is the landlord rich farmers bullies said, because cooperation does not meet his requirements. He feels there is no freedom before. We say that cooperation superiority is iron fact here, in the past, not only can not land a large number of fields, poor farmers do not have this power Amount, only rich farmers have the power, since cooperation not only the fields are planted In addition, many wasteland improved seeds have been opened, and manpower is concentrated, there is no wasteland. After the cooperation of agriculture, the government has given great care to farmers and run some schistosomiasis stations. In the past, farmers could not be treated for this disease, and the reactionary government can care this way! This is not the superiority of cooperation. There are still many five insured households in the countryside that have food and clothing. How can the government pack them down? I'm a sister, seven kids, nine, and we ask him what? He said that it was much better than before. In the past, it was exploited by landlords to eat three months of food for three months a year. Now not only are two arrangements for couples, but children are arranged, and three children have improved their lives in school. Isn't the Communist Party leadership not a cooperative bank? Landlord rich farmers rogue bullies in the past have lived an exploitative life. Peasants have to get him up first. Now they are bad, that is, they cannot meet their requirements. What are the problems that exist in rural areas, if a few cadres have negligent placement in contracted production, there will be no problem if they are slightly cautious.

Zhang Ya-qing:

Now there is no rain for months now. Now there is electricity, it is not a collective shrine, the government can't help, either the government can help, the increase in foreign production is a trial. There is a collective side industry in rural areas with fish and pig feeding ducks. If they go to the society, don't take big money to see the accounts are sidelines. Individuals in rural areas and test sites will not be able to do so., said that there are eight societies in ten societies that are bad. It is said by a few people, the difference between the society and the society There are no few, these fallacies are not other than this general statement, that these people can unite him, and struggle to control without love of solidarity education, except for the early completion of socialism.

Zhang Daxuan: In the past, the farmers used to cultivate water, after liberation, the countryside changed to a motor to fetch water, reduce a lot of labor. Now rural areas and townships set up telephones, some installed lights, and currently use double ploughs to cultivate the land, deep and good, rural farmers still have a little bit not used, this thing is

good, old farmers talk about double ploughs. Is much better. Gradually replanting double seasons of rice. In the past reactionary period, we couldn't talk about this thing at all, saying that there were eight bad cooperatives. In the past, I saw in the countryside that people in the past did not believe everyone rushed to cooperate lately. That is, rural middle-aged and small children were not able to do it alone enough. Agricultural cooperation would concentrate on everyone to do it now. Moving, doing half a day does not matter, saying that there are eight bad ones are not in line with the truth.

Shen Zu

Prior to cooperation, rural areas are individual economies, strong labor incomes are better, the labor force has an impact on less income, water conservancy is good, a certain water conservancy is poor, and often disputes arise for water conservancy. Not only do they have difficulty impeding production in incomplete agricultural operation. If natural disasters are going to happen, there is a problem with acute diseases, agricultural technology is conservative, do not know improvement, do not know the expansion of cultivated areas and improved varieties. These are all the phenomena that arise from individual private ownership systems. After cooperation becomes collective ownership, the cooperative capacity will only be used to do their best to agriculture Income has a great impact. There will be no lack of tools for the collective use of agricultural tools, and natural disasters also have collective strength to resist, such as droughts, Organized to pump water a few miles, water disputes have also been resolved. Collective production to engage in side-industry resistance against pests and diseases in the schistosomiasis station. I have acquaintances with the name Xu get old old disease in the Democratic Society, and sent it to the anti-schistosomiasis station. The family club has issued food and disease is also optimistic. Is this not the benefit of cooperation? The farmer's motivation to expand the area of cultivated land has increased. This is, this is, the benefits of the public ownership system have been done in a comparative and cooperative manner. There are advantages, saying that there is no superiority is the landowner's wealthy farmer. I am a layman in the countryside. I think I am a layman. I think the current production of large sidelines of cultivated land is increasing, fertilizer may be big. Great increase. There are individual farmers who are not accustomed to replanting two-season rice. They should also be strengthened in the area of political education and propaganda. In order to better utilize farmers' enthusiasm and love labor, moderate increase cadre participation in manual labor should be implemented. Our leading cadres want, but the workers are more diligent.

Yu Dahan:

Our cities can have or not the superiority of grain, rice now, proving superiority, the benefits of collective superiority are mostly five insurance benefits to repair water conservancy, and the government food and relief transfers can only be done collectively.

Listen to Minister Liu, there is water on the side of a certain society, there is no water on the side of the mountain, and water can not be used. After cooperation, water is available. To get there, after the cooperation, the two-season rice was implemented, and it would not work before cooperation. When a haircut, he now does not receive it from single to a collective hospital. It was written by the Society to introduce the Institute to recapture more than 200 yuan. How can I do it? To say that there are eight bad intentions, the landlord rich farmers do not care about capitalism. A little bad, he will propagate a lot and spread rumors. Some problems are the number of cadres performing in rural areas, some deviations, the level of peasants is not consistent. It is not surprising that cadres have some whatsoever or feel from emotional impressions. The general cadres are still younger, and they cannot use their grades, there is also a problem with rural school enrolment, and the labor force with many children is small, and the government's mistakes are individual., and can not be universal, now much better than doing alone.

Li Yahou:

I was originally from rural areas, and I did not understand enough about the countryside. From what I know, I would like to say that there is no superiority in rural cooperation, it is that a handful of landowners rich and peasant bullies rogue ruffles, they are dissatisfied with the upside and the poor farmers say that cooperation has a lot of advantages. Individuals move towards collective production, this year's society is abundant There is no reduction in yields. It is well known that the second is that poor farmers alone are poor It is not normal, after cooperation, life has improved than alone, how can we say there is no superiority! Rural increase many side-industrial production, too much of the peasant line? There is a power to work together without funds or tools to solve many problems in life that cannot be solved. Hing water conservancy road repair pond have been specifically realized, tools are changed to new style, except for the pest, this is not the superiority? I have a family working in Huizhou, Jiangnan. He said that cooperation has great results, only many people from some areas of Huizhou side food, because farmers' enthusiasm is better than general cooperatives, others also have achievements, only the size of the grades, good or bad, people with different intentions say that there are eight bad ones. We in Jiangbei Huaining said to people that cooperatives are roughly as if the situation in Jiangnan.

Ye Songbai:

On this topic, some people say that peasants have not improved their lives is black and white. In the past, farmers were exploited by two ways, exploited by tenant owners and usury loans, and were unable to be full of hungry bellies. Now it is not anymore. My four sons, my relatives and friends, who used to buy blood sucking center disease, are now not only living well and sick. A new house was built. In particular, in February this year there was a tooth burial grave with 40 yuan. In the past, not only did it not have the money, but

also borrowed it. Culture, all night school was enrolled in night school. In general, there were senior primary schools in rural areas to achieve universal education. Contrast this year and last year, every double season rice pick suffered loss, was affected when it was founded, did not do it according to local conditions, cadres did not undergo thought test. Now Okuda species bi-season rice, the Itafield is not kind of two-season rice, the increase in yield is great, last year's fixed production quantity is only higher. This year's fixed production quantity is limited to a higher quantity., There are problems in rural areas. Fertilizers cannot catch up with production needs. This is a reflection, but there are many children working in rural areas Yes, some views are not the same. Absolute egalitarianism can not be the same. Most of the labor force will enter more, and there are differences between the grass-roots teams to take their needs. This is the same individual, the same difficult subsidy requirements for problems, probably the same, should not be raised from the minds of farmers, to build a society from the right. The Huiist Taisha should do its best to build farmers also have this strength and enthusiasm, and should come up from the minds of farmers That's what the opponents of socialism say so.

Chu Qingchu: I think cooperatives have superiority, and the Party's policy is fundamentally correct. If you do not organize a post-operation society, it becomes a bad spontaneous nature. Organizing cooperatives is much better than doing alone. I went to rural areas last April, and cooperation to Jing County is very different. Farmers see we go very enthusiastic, we go to Dad there is exactly the time to eat, they want one, each house has salted fish eggs Good food is very good. Why have their lives improved? The benefits of cooperation, use of household women to collect tea to increase their income, collective production is more than in the past. In the past, the grain area is small, exploited by landlords who do not produce food, buy rice is also exploited by traitors. After cooperation, each income is 1,000 yuan, each living in a tile house, there is a strong one. Son, daughter-in-law, son with three ham in the mutilated house. We asked whether the Yumiao water conservancy repair is good or not, how to put it, from the Yangzhou line, this is only the development of cooperation, said that eight of the ten have broken down. Without this statement, we can only say that there is a difference between cooperatives and cooperatives. At present, those problems exist in the countryside. In the past, the labor model said that the cooperative electric lamp telephone was too fast, the peasant desire was too fast, there was an impatient mood. Some people said that rural food was not enough to eat. My visit said how I couldn't talk about life in the past. Most tenants residing thatch had food running there, saying it was wrong to have no improvement. Is there a difference between workers and peasants? Urban living is high, rural living standards are low, some things do not buy, save more, and the price is much cheaper. About 30 yuan of urban workers can only reach rural farmers' lives in January. The figures with money are not right. I think there is no difference in life. I think there is no big difference in life and should not be pumped out of the peasant tummy Something

to build socialism, build a bastion of the socialist working people, saying that what pulled out of the peasant belly is fallacy.

PAN Luen: For the peaceful transformation of business and industry, some people say that cooperation is better than alone. It is by right-wing elements. First we need to make clear that the advantages of cooperation are gradually taking place. Our joint venture in the 58-year climax, everyone has come to a joint venture. In the middle of the wind, the right-wing activists still have to go to capitalism to incite rumors. Four workers in the top five joint ventures have paid their wages. After the joint venture, the private side also took wages, and there was a head of life. Now some alone, walking a little slower, he is not alone, such as getting three yuan to binary every day, the rain can not engage in a little more life, it is not good for children and daughters. Some cooperatives also make it clear that joint ventures are of the same nature. From my ears, newspapers say that in the past a bed was used for several generations, they were not fed enough. Since agricultural cooperation, life has risen, and the two couples are still more than involved in working life. Ten say that there are eight bad. These eight may be eight bad to provoke separation in the community, not cooperation, we say that 90 percent of cooperation are good.

Yuan Anren:

My personal opinion on the four or five or five issues above is much worse. Cooperability is very superiority. He said that there are eight bad things, they are distorting the facts. The right party only says this is the case with socialist dissatisfaction. I talk about the second issue. Some people say that the general purchase and sale of food is messed up. I am sure this policy is good before liberation, to talk about the autumn harvest before liberation. After the large households buy the food, hoard the odd, earn near selling the people will be exploited At that time, they could not buy money. After liberation, the majority of people under the leadership of the Party and Government could not buy food, prices were stable. It was good that the people had no opinion on policy. Only right-wing anti-revolutionary elements were dissatisfied. Apart from this policy, there is no better way than this.

ZHANG GERU:

Listen to the rural people say that cooperation is good. My relatives and farmers have not participated in the cooperation before. They often talk about we have not participated, I don't know when we can participate. They also see cooperation is good. They also see the collective strength of Xingxiu water conservancy peasants and see the collective strength of Xingxiu water conservancy and peasants see that they do not work alone, but the **culmination** of cooperation, capitalists are happy to say also Participated in cooperation. On the face of them, they long said that polder drainage and water drainage are all collective strength. If the polder could not be able to protect it this year, this will get a

good harvest, saying that cooperation is good for everyone to increase a lot of food, so it turns out that cooperation is superior, saying that there is no superiority of landowners, wealthy farmers versus socialism Dissatisfied, the workers say that there has been no improvement in rural life, and now not only poor and middle-aged farmers, but also rich farmers, also feel this. Life is also gradually improving. Zhang Dongye said that farmers have bitter water. In fact, they have not heard of bitter water in the countryside at all. Farmers have problems: We have heard that some cadres are called suitable for local conditions. Some cadres have not done it. They call dry rice not grow up for a few months, there is little labor, and the large population also has this situation. Life is improved. Rightists maliciously say that the countryside is very bad, saying that the peasant belly is not good, this provokes dissenting dismissal Peasants are dissatisfied with the Party, saying that the purchase and sale of the party is bad. We can all see that the Communist Party has a good overall purchase and sale is obvious. Not only is it good to buy water and rice in five or four years, but also the price is not enough, even freight costs are not enough. There is no second way to sell better than all purchases.

Pan Shaohong:

The superiority of cooperation is certain and cannot be erased. Agricultural cooperation is the law of the development of the socialist system, and landowners are not satisfied. Therefore, he provoked farmers' relations with our Party, rural land reform, toward mutual aid groups towards cooperation to higher societies, expand the area to produce land and improve varieties, and increase agricultural yields before cooperation to increase agricultural production.
