

**Luo Rui-qing: “On the Situation and Current Tasks of the Ministry of Public Security: Report of Comrade Lo Ruiqing at the General Meeting of All Officers of the Ministry of Public Security on October 19, 1957”**

[Editor's Note of the Public Security Construction”: The minutes of the report were compiled by the Office of the Ministry of Public Security, according to the records, and have not been reviewed by myself. The subtitle is also added by the Ministry of Public Security Dynamic Editor.]

Comrades:

Comrade Deng Xiaoping has made a special report on the situation of the whole party and the whole country's winding movement. The report provides a comprehensive estimate and an in-depth analysis of the current state of the wind movements, summarizes past experiences, sets out tasks for the future and provides a clear picture of future approaches, policies and practices. This report, which has been published in the newspaper today, I hope you will learn very well. I would like to report to my comrades today about the movement of the Ministry of Public Security. Of course, the movement of the Ministry of Public Security is not isolated, and many cases are as analyzed by Comrade Xiaoping. Comrade Xiaoping's report and analysis are also perfectly suited to the situation of the Ministry of Public Security.

**The fight against the right is a profound political ideological socialist revolution**

The rectification campaign of the Ministry of Public Security began in early May. After communicating and learning the instructions of the Central Committee on the rectification movement and Chairman Mao's report on the correct handling of internal contradictions among the people, it entered the phase of Daming magnification in late May. All the comrades of the Ministry of Public Security, during a period of more than a month, put forward many useful criticisms and opinions on the leadership, improving their style, and improving their work through various forms, such as symposia, group meetings, large group meetings, large print papers, and small print newspapers, etc. More than 400. However, the bourgeois right took advantage of the opportunity to carry out rampant attacks against the party during the magnification. A group of right-wing elements was similarly exposed in our organs, which we did not think of at that time. At that time, we thought that there was a right wing, and the newspaper had been published, Luolongji, Zhang Bojun, Zhang Naiji, Huang Shaohong, Ge Pei Qi, and so on. This is not to be doubted. Did the Ministry of Public Security? We originally thought that the Ministry of Public Security had a lot of party and team members, and had been engaged in seven or eight years, and after many campaigns, probably won't have it. If there is, not much, and at best it is just a little right dross. It turns out that we are wrong to think.

These right-wing elements, their fellow parties and people are in full hostility. We say the wind, they say to step down; we say to rectify the style and correct the shortcomings, they will oppose the leadership of the Communist Party, oppose the people's democratic dictatorship, not the socialist system; we say that we want to deal with the internal contradictions of the people correctly. They say that the Communist Party can't do it, they have to come out and clean up the situation. They said they wanted to kill members of the Communist Party, “China does not have a Communist Party, and no one will sell the

country.” “The Chinese people, including anti-revolutionaries.” What “party world”, “big monk, small monk”, what “political design institute”, “ordinary committee” and so on came out. This, as the People's Daily editorial says: “Trees are quiet and wind.” We have the wind, the wind, the wind and the wind openly; they burn the fire, the wind, and the wind against the wind. What we burned was the sun fire, burned down three, called the three harm; they burned the fire and wanted to overthrow us by plane. They underestimate the power of the people and overestimate their strength. They are very unconvinced of the three major transformations of the five major sports, calling it “too old to move ground”, saying, “This laozi can get you a whole thing”. After the 20 congresses of the Soviet Union, the anti-Communist trend around the world and the events in Bosnia and Hungary, we propaganda to correctly deal with the internal contradictions of the people. They all believe that we must not step down, the ordinary people are opposed to us, plus the whole wind, they thought that the time was coming, and the gods of the cattle and snakes went out together. In the past, it was thought that Zhang Bojun was a leftist. This time, it was also exposed. It turned out to be an old right, reactionary politician, and a rogue. History has turned over, and it As for Huang Shaohong, Luo Longji, Zhang Naiji flow not to mention, everyone is very familiar. We are windy, they attack, and the purpose of the attack is to restore it, to overthrow us, that is, to pull the new China back to the status of the old China. They foment, ignited, targeted, first and foremost millions of intellectuals, college students. In a short period of time, a part of the left was dismayed and the middlemen shaken, saying that the Chinese Communist Party was not long. China's sky is a little dark and cloudy, and it seems like a little darkness and day. The bourgeoisie right strongly attacked the leadership of the Party, the people's democratic dictatorship, political opposition, rebellion, and democratic centralization. Whether or not we have revolutions in the past, whether we were right in the construction, whether we want party leadership, dictatorship, whether our country's foreign policy is correct, etc., all become a question.

In the press, they all usurped the Guangming Daily and Wen Weibo, driving the party members out. The Xinmin Evening News, the Grand Gazette and the News Daily also have some problems.

In the school, famous figures such as Liu Qidi, Tan Tianrong, Lin Xiling, etc., were very angry. Lin Xiling in and out there is someone for his bodyguard, in and out is to call back. Among the democratic parties, the worst is the NLD, followed by the Democratic Revolution and the 93 Academy.

There are also a lot of problems in State institutions, scientific and technological circles, and the medical community. There have also been great things in cultural circles this time: Ding Chen anti-party group, as well as Feng Xuefeng and Jiang Feng. The situation in the political and legal circles is even worse. In addition to the right wing of the public security system, the judicial system has a large group of intellectuals, old law personnel, who are attacking us in the six-law book. State Council Counsellor Yang Yuqing (who will be the Deputy Minister of Justice and Administration of the Kuomintang) openly asked us to step down. They came to power. They said that workers and farmers could not work, do not understand business, and use all means to negate them. It has now been revealed that many old law personnel used their power to shelter the counter-revolution,

many cases of minor felony sentences and the failure to sentence, some of which were made by these right-wing elements. They used their power to purport counter-revolutions and bad people.

Women also came out of a few big right, and six “female generals” were revealed at the Women's Conference: Pu Xixiu, Ding Ling, Liu Wang Liming, Tan Tiwu, Peng Zigang and Li Jiansheng.

All this means that the class struggles that will have been eased from last year have regained tension due to rampant attacks on the right of the bourgeois.

In that period our friends were very discouraged. Americans are very happy, informing the intelligence agencies to work 24 hours a day and constantly gather intelligence, saying that China is going to change, meaning that the counter-revolution will be restored in China.

In this case, what to do? The Party Central Committee and Chairman Mao estimated the situation. Since they want to engage, they enlarge the song, and all are reported, consciously put out all the cattle ghosts and snakes, and let the people of the whole country look. Knowing that on June 8, it was too different, anonymous letters also came out. Anyone who said a good word, they intimidated; Zhang Bojun convened a meeting of 6 professors at the CPPCC Cultural Club, saying that they could only clean up the “mess”, and so on. At that time, the People's Daily published an editorial, which is very pleasant. Mobilizing the masses and fiercely fighting against the right. Our struggle with the right has become inevitable. How can the wind rectify without fighting back? The right says that we are “conspiracy”, we say this is “Yang”, we have always said that it is poisonous grass to hoe off, they attack, of course we will fight back, fight, this is not to blame us. The nature of this struggle is a class struggle and an enemy struggle in class struggles, two stages (bourgeoisie and proletarian), two ideas (bourgeoisie and proletarian thought), dualism (capitalism and socialism), two paths (the path of capitalism and society) (path of doctrine) struggle. The nature of our contradiction with the right-wing elements is a contradiction against us, not within the people. The Chairman said that socialism could not be built without the fight against the right and if we did not win it. The right must be fought back. Without them, they will bring us down and socialism has no hope. Last year, we only triumphed in changing ownership of the means of production on the economic front. The exposure of the right is that we see more clearly that political ideological struggles have not been resolved, no decision is made to win or lose. Of the millions of intellectuals, some of our parties have no leadership, or leadership is not consolidated. In favor of the Communist leadership, they raised their hands, wrote the constitution, and this time exposed them to false. It is dangerous if we do not fight back on the right, but be satisfied with economic change of ownership; ownership that has already been changed can change back.

The struggle, not only in cities, but also in rural areas. The Chairman said in the “Summer Situation of 1957”, Comrade Xiaoping's report also mentioned that there are actually two paths of struggle in the countryside. How can we build socialism successfully without resolving this problem? Our socialist system today has not yet been consolidated, the foundations of our economy have not yet been built, and our country is not yet industrialized. Agriculture has been cooperative, but it has not yet been modernized. In

addition to landowners, rich farmers, counter-revolutionary and bad elements, there are wealthy farmers in rural areas. Some of them are socialist, about half shaken, and a few are opposed to the socialist path and want to take the path of capitalism. Of course, they still want to be united, but to transform them. In the past, we said that agricultural cooperation had dipped the capital class from its roots, and that was not necessarily the ideological solution in terms of its economic base. Some people say that food production has not increased, farmers' lives have not improved, peasants suffer, cooperatives do not have superiority, all purchases and sales are messed up, and so on. In addition to the right-wing elements, they reflect the idea of some wealthy farmers. I had an attendant, a good ingredient, my father was killed by the enemy, and my mother was starving to death before liberation. This little child was affected, saying that his hometown was hit, the bark was eaten out, peasants suffer, and so on. After investigation, it was not true that not only did not eat bark, no leaves, but also food supplies as in previous years. He was just because he listened to the words of a few wealthy Chinese farmers who came to Beijing to do business.

The fight against the right, a profound political ideological socialist revolution, has won the significance of victory, cannot be estimated to be small, and is a great thing of world significance. Whether the anti-right is complete, and the 600 million people do not go away from socialism, is having a major impact around the world. Putting the right down and pushing our revolution one step forward. In this struggle, the vast majority of people are educated, and millions of intellectuals will be better united, minded, transformed and isolated from the right, so that they can catch up with and exceed the level of American production. Because the experience of the Soviet Union offers us to learn, it may not take that long. However, if we do not work well within ourselves, the people are not united, do not completely isolate the right, the people's democratic dictatorship is not consolidated, and the leadership of the Communist Party is not consolidated, all this will not be obtained.

The Ministry of Public Security's anti-right struggle is a decisive victory

The anti-right struggle by the organs of the Ministry of Public Security has been going on for a total of four months. Under the leadership of the Central Committee and the State organ, the struggle has been widely and thoroughly carried out through the joint efforts of all comrades. To this day, a decisive victory has been achieved. After defeating the right-wing offensive and refuting the fallacy of the right, cadres of a wide range of organs and cadres in the socialist revolutionary struggle on the political front of the ideological front have greatly increased class awareness, political enthusiasm and motivation to work.

The first is to rebutt the right, even if not all the guidance, 80% of the rebuttal, is also considered a victory, and the achievement is the main thing. The 20 backbone molecules are all refuted.

The second is that public awareness has increased. Some comrades, who began to discern the boundaries, not to distinguish between the big and the big African, have now drawn the boundaries.

The aim of the anti-right is nothing more than isolating the right, rejecting the right, unifying the masses and consolidating socialist ideological positions.

This time, the anti-right, is healthy. If in past movements, such as the three anti-back and

second checks, there are some shortcomings wrong, bring some side effects, the fight is wide, or rather rough, this time it will not be. We insisted on the truth and reasoned, the gentlemen did not move their hands, and there was no humiliating to the right-wing elements. Many comrades are also actively studying theories, looking for reference books and preparing them in order to justify and refute the right. In this regard, the right helped, forced us to read books, find weapons, and such learning was very meaningful, would not forget, and would not offend dogmatism.

Our exercise is normal, healthy, and results are the main and basic. Right attacking us saying this is the formula, and now we still have to use this phrase, because this is the Marxist formula, the truth, is the truth.

There are now 62 right-wing activists (2.6% of the movement) that have been revealed in our office. Of these, 20 are the backbone and 42 are generally right-wing.

Among these right-wing elements, the party and party members make up a large percentage, 90% of them are party and team members. 36 party members, representing 58.1 per cent of the number of right-wing elements and 2.3% of the party members participating in the movement. 21 members, representing 33.9% of the number of right-wing elements and 4.5% of the number of members participating in the movement. Non-party members, five members, accounted for 8.1% of the number of right-wing elements and 3.82% of non-party and group members participating in the movement. Why the party and the team members? Because there were already many members of the CPC Central Public Security Ministry. Of course, most of the party members are good. But there's the right.

Of these right-wing elements, 41 were working after the national liberation, accounting for 66.1 per cent of the right-wing; 12 worked during the war of liberation, 19.4 per cent; and 9, or 14.5 per cent, during the war of anti-Japanese. In terms of the administrative positions they hold, there are six chiefs, representing 9.7 per cent of the right-wing elements, and seven section chiefs, or 11.3 per cent. A total of 21 per cent at the section and service levels 8 translators, doctors, technicians. 41 clerks, 66.1 per cent. Because the vast majority of this group of people work after liberation, they are in large numbers.

In terms of literacy, 32.3 per cent of university students are among the right-wing elements; 35.5 per cent for high school students; 27.4 per cent for junior high school students; and 4.3 per cent. Of the right, 67.8 per cent of university and high school culture. College students or high school students, they are relatively high in culture, more knowledge, are good. However, there are weaknesses, especially at present, many college students are still born from landowners and bourgeois families, lack of feelings from peasants with workers and lack of exercise in struggle. This is a drawback. Be conscious, don't think you're a college student, highly knowledgeable, amazing. Intellectuals are already knowledgeable, but sometimes intellectuals can become the least knowledgeable. If he does not exercise, does not accept transformation, does not participate in production struggles, different workers and farmers build feelings, and have no knowledge than workers or farmers. As for the knowledge of class struggles, much less. Because he did not enter the class struggle, at least read a few books in school, that did not solve the problem completely. Not only now, but also the intellectuals of feudal societies, or the intellectuals of capitalist societies.

Of course, it is wrong to deny everything to college students. College students are our precious assets and are dependent on building socialism. How can we do without knowledge? But on the other hand, they have weaknesses, and this right-wing attack, their main markets and positions are first and foremost five million intellectuals, which is no accident. Lin Xiling is a college student. Of course, the vast majority of college students are still good for more than 90%, but be vigilant about weaknesses, and don't bother yourself. Especially those who are just out of the school, there is a lack of fighting exercise. Students who received social education after liberation did not exercise. Only book knowledge. The capital-class education, which was fully educated before liberation, was the families of the bourgeois landlords. How can the wrong reactionary things not affect these people!

Right, this is a political standard, not by office. Why a little more among the clerks and clerks? Because this layer is more people. But it can also be seen from here, for example, that most people are young intellectuals working before and after liberation. They are no transformation, no exercise, and refuses to transform, refuse to exercise, and to be terrified, just like the day before (October 17) People's Daily, Laoshe said Liu Shaotang, Only 21 years old a few articles, a blow, more than a draft fee, the countryside does not go, barely go to the countryside to bring White noodles, bought a house in Beijing, said that America is good. In fact, he doesn't know what the United States looks like, that is, he is a "prodigy", "genius", "talent", "talent", and his brain is bloated, the world's first, and can't rest anywhere. Laoshe said, Where is it unstable, there is a place that is, in the ranks of the right wing. Comrades, old she said this is very profound.

Of course, some people were "old party members" and "old cadres" who participated in the work during the war of resistance against Japan. The vast majority of these so-called "old cadres" and "members of the old party" have assumed the leading positions of department chief and section chief. The problem is that some young intellectuals refuse to reform and do not take part in the actual struggle. Some old party members have mixed up within the party for one or two decades. If they are not reformed, dirty things are not washed off, or not mixed up, they will become the right. For example, Ye Tien, he is also one or 20 years of party age, both the right and a bad guy. A French journalist Logan went out with a telegram saying that Hu Feng was released. The source was Ye Tian. So old party members are old and incorrect, the older and worse. In this sense, it is a little bit better for young people who are undergoing transformation. Old and not right, carrying a burden, hurts himself, because he always has a little capital, and young people (not a minority of the right-wing, the majority of them here) have less capital and may be a little modesty.

During the time of the big magnification, the right-wing elements of our organs will also be very arrogant by reactionary flames. What is there in society, we have everything here. They echoed the right-wing elements in society and carried out rampant attacks against the party against socialism.

One is to attack the town counter, counterproductive. We specialize in this matter, and he attacks on it. The right-wing elements are trying to deny the great achievements of anti-township and counter-insurgency. Their characteristic is that in a series of issues that have long been clearly resolved, they are overturning articles. Especially against the town of 1955, a lash. With regard to the acute situation of the struggle during the eve of the 1955

Socialist Revolution, the sabotage of the anti-revolutionaries during that period was not a contradiction against me, but an internal contradiction among the people, fundamentally negating the necessity of a second counter-township. Its man is Lian Ying. They said that the two towns are completely unnecessary and should be resolved in accordance with Chairman Mao's approach to correct handling of internal contradictions among the people.

They said that the second anti-town movement was the first “reprint” and “legacy” of the anti-town movement, and “mechanically shifted the experience of the first anti-township movement” and thus made an “empirical mistake.” This is also a person in the lab, whose name Liao Xianjin. And he said to me, “If we mistakenly capture 50,000 people, a house of five, there will be 250,000, three homes, there will be 150,000 homes, and the house is broken, and people are dead, you will not be sad at all.” So many dead? Without that thing, we all corrected it. Some caught this evening, and we'll release it tomorrow. Let's release tomorrow, the house broke away? As for the counter-revolution in Guantao County, which killed our home of nine, seven people were killed. They could not see how many of them died at the anti-revolutionary criminal evidence exhibition, they could not see. Not only did they cry for the wrong town in 1955, but it seemed to be wrong even for the first time. Because it's called “legacy”?

They believe that the Seventh National Public Security Conference was largely a failure, saying that the targets set at the meeting to kill counter-revolutionaries were not in line with the actual situation and were highly subjective. Seven times public security, we had mistakes. That is, when the situation began to change, we did not see it, but the situation became apparent afterwards, we immediately changed, and did not do the same as public security seven times. Such mistakes are common in nature, and such mistakes can not be avoided that year. It may also happen later. We are also criticized for “shame answer” without self-criticism. What shame answer? Seven times the public security white paper wrote black words, you can see. Put the process out, you can discuss.

They believe that internal countervailing shortcomings and mistakes are serious, and denial of achievements is the main one. That is what Xie Guang said. Xie Guang is also a research room, and his people are no longer in the world, and he himself made conclusions to himself. He is a dead right, not willing to transform. History has also been problematic. Such people are dead without a pity. Don't be so soft to the right, because a little softer about them, they will turn hard toward the people.

They also focused on attacking the counterproductive work of the organs of the Ministry of Public Security, saying that it is “killing the chicken and taking eggs” (Xu Tailei), saying that the Ministry of Public Security is “no counter and no mistake”, and quoted as saying that “the Ministry of Public Security is still so, and can be imagined all over the country” (Wang Luntang)! Stigma and repudiation is to implement the policy of “rather wronging many good people” (Wang Hongye). They echoed with Lorongki's proposal to set up a “ordinary committee”, and proposed to set up a “counter-inspection and handling team” composed of general cadres to examine the counter-actions (Huang Wenzhong). The second is the leadership of the opposition. They oppose that the Ministry of Public Security must ensure absolute leadership of the party, arguing that the public security department should involve democrats in fact the bourgeois right. He said that there was no way for the public security sector to exercise mutual supervision without a democratic

party. Lv Qichao speaks. They want to turn Luo Ruiqing back and hope that Huang Shaohong will come to the minister, and the right-wing elements Wang Xiang and Wang Luntang as leaders (Deng Hongkui). Huang Shaohong can eat miles! It was heard that the right wing of the procuratorate demanded that his party's attorney general be called, and the court right asked his party deputy Huang Shaohong became Minister of Public Security. Huang Shaohong went to Guangdong to talk to the agent, rampant and asked: "Do you know that a national has a Huang Shaohong? Our urban family, I am Huang Shaohong. There's something bad in the class room." They are all family, and we are two families, and that's right. Rightists also oppose the Communist Party group in state organs, arguing that the existence of a party group necessarily leaves democrats "with no power" (Yang Changyu). The outright approach to the "three hazards" is to "root down" (Tang Youyi). He said, "The wind is for leadership cadres to exceed the soul" (Cheng Yi). Scolding the Ministry of Public Security is "abalone", scolding people who do not mention opinions smells used to smell, and for a long time not to smell (Wang Mingdi). Some people say this is a speech disease, and I see it's the most vicious scolds. The Ministry of Public Security is "male and female prostitution" (Yuan Hao). He said, "Entering the Ministry of Public Security is into the eighteenth floor of hell, and never be superborn" (Peng Shaohui).

Third, it opposes the socialist system, opposes the proletarian dictatorship, and attacks the democratic centralization system. They deny the superiority of the socialist system. Thought that after the completion of the socialist transformation, it was not as good as before the transformation, and deplored the failure of the Kuomintang (Huang Wenzhong). "Socialism is coming, the quality of the products is not good, and Donglaishun's shabu-shabu meat is not delicious. Many problems in socialist construction and socialist transformation need to be re-examined" (Zhang Youjie). That is to deny that our revolution is triumphant, construction is successful, and that socialist construction and socialist transformation are not good. Is it bad for millions of tons of steel, Yangtze River Bridge, Changchun Automobile Factory, manufacturing aircraft tanks? Donglaishun Shabu lamb represents the socialist system? Socialism is measured only by Donglaishun's shabu lamb?

They denied the superiority of agricultural cooperation, saying that the increase in grain production figures were bragging and unreliable. They believed that agricultural cooperation was fast, and the purchase and sale was wrong (Lang Ying). They also said: "Eat bran and eat bark, not forget Chairman Mao" (horse farm bolt). "Farmers in the feudal dynasty are not as bitter as they are today" (Li Ruiyi).

They maliciously attack our democratic centralization, defaming our country with concentration and no democratic freedom, and they aspire to the democratic freedom of the bourgeois. To say that farmers in our country are too restrictive and unable to play their personal opinions (Tian Yingzhen). Said that we are "sinful speakers, the news does not stop", "a gust of wind, down the tumbler" (Wang Lun Tang).

Fourth, it is the policy of defaming the Party and the government cadre. Their policy of slandering the cadre of the Ministry of Public Security is a mess. They cannot see people, and they are "only qualified." Said that the Ministry of Public Security "VF-F No 50 (probably refers to the Director of Section or above did not work after 1950), the lower product is 38 (refers to 38 years)" (Wang Mingdi). Is this something worth attacking? Is

this the historical condition stage.

He said that the old cadres were qualified to eat, and they cried for the old cadres to withdraw from their leadership positions (Deng Youyi). It is certainly not good for old cadres to eat on the basis of their qualifications, but the old qualification can also eat a little meal. The main thing is not based on qualifications, but the so-called qualification is to participate in the struggle. Eligibility as a condition is not completely impossible. To stigmatize us to intellectuals is “exploiting, restricting, transforming. It is to use its technology to limit its development and transform its motivation” (Huang Chengzhong). They stigmatize the Ministry of Public Security to embrace the sectarian stereotyping of intellectuals that are “non-homogeneous, their hearts must be different” (Yang Changyu) and adopt a “high-handed policy of human rights” (Wang Xiang), “like slaves owners treat slaves” (Ma Yun-zhen).

Five is to attack the socialist principle of remuneration based on labor. They slander our socialist wage system as a feudal hierarchy, a hierarchy that governs everything, saying that “there is a strange shadow of a hierarchy that roams at the Ministry of Public Security” (Li Jinya). Even maliciously saying that the children of leading cadres have become special classes, saying that “children born after the sperm and eggs of leading cadres have a class” (Cheng Lu).

The right-wing elements not only magnified the above fallacies, but also from the time of the time when the anti-right struggles, they have been actively engaged in activities, fomenting fires everywhere, and excitement (such as Wang Dai), many right-wing elements have encouraged others to attack their leaders. Some gather everywhere “material” to lead the attack, and even oblige the secretary of the minister and the secretary civil servant to provide so-called “insider information”. Some and colluded behind the scenes to organize “cooperatives”. Now, three are found, one is a small anti-party group headed by Ma Huanren. They are deployed by an underground command, deployed in combat, and political work to encourage emotions. This man is the old right and has always been bad. When the Ministry of Justice was the head of the wind group, he did not reverse the right, using his authority to inform Tan Tiwu of what he had attacked us. Another is an anti-party literary group headed by Liu Yi. There are also the so-called right-wing “three brothers” with Lee Jinya as his brother.

Some right-wing elements have also unscrupulously amplified reactionary rhetoric and resisted the struggle after the anti-right struggle began. Xu Tailei wrote a poem on “Poultry and Livestock”, “Soul” and “Untitled”, which reveal his extreme hatred of anti-right struggles and activists. His poem, “Jing Ke”: “Jing Ke is not reborn. Today, the Fighters have lost their lives if they are for freedom reasons”, expressing his political extreme reactionaries and trying to desperately revenge against the Party and the people for the sake of bourgeois freedom. Huang Wenzhong made his dissatisfaction with the fight against the right with a lot of sleep, alcoholism and temper. When the group criticized him at the meeting, his reactionary fire was arrogant. The comrades asked: where do you have the right to hit a lamp gun? He said: What places do I have no power to hit a lamp gun? Q: Which way do you go? Answer: Decided to go dead. Q: Where is the Communist Party sorry for you? A: I can't meet the people I want to be ruler, like Chiang Kai-shek did... Many right-wing elements, who insisted on their reactionary

stance in the struggle, refused to bow their heads to confess mistakes and tried to confuse them. Some of the less visible right-wing elements exposed when they magnified, would like to retract and wait for the time to come back. As for the right-wing backbone, Xie Guang, resisted the end with shameful suicide.

These circumstances indicate that the Central Public Security Ministry, such a leadership organ of the proletarian dictatorship, the emergence of such a group of bourgeois spokespersons and a group of bourgeois internal affairs, this is an extremely serious phenomenon. Is it not very dangerous that our public security organ is the fighting fortress of the Party and the people, and the fortress is the easiest to be taken from within. It is not very dangerous that the inner who tolerates the bourgeois right should be mixed with us, and some are still in our important positions? For example, our research office is our staff counselor institution. Only 10 individuals are Xie Guang, Lian Ying, Liao Xie Guang and Liao Xianjin. Xie Guang is the actual leader of the laboratory, and the Party becomes no leadership in the lab. Again, as one bureau is a very important investigation department, there are also right-wing elements like Lv Qichao and Yang Changyu who hate the Communist Party and the leadership of the Communist Party. They have been directly involved in the anti-town movement and the fight against spies of agents for several years. When the bourgeois right attacked to slander the town, they do not stand up to counter the enemy, but instead rise up in response to the enemy's attack and become the enemy's internal response. How serious it is! In this sense, aren't the right elements within us more dangerous than the ordinary capital-class right and more abominable?

That is why our anti-right struggle at the Ministry of Public Security, apart from the general sense. It also has more important special significance. Of course, the right does not turn off, it's not good there. But it's even more dangerous here with us. So the Ministry of Public Security, the better the anti-right-wing counterparty.

The fundamental problem is to stabilize the proletarian stance and transform their minds. Why do these right-wing elements appear in our Ministry of Public Security organs? Wouldn't it be strange? Of course, it seems a little strange, but it's not surprising to look through the problem. Let's take a look at the situation of the 62 right-wing elements dealt with, and we can understand.

First, there are 24 persons, or 38.7 per cent, who are born of exploitative class families, or whose relatives are suppressed, regulated or struggled, and therefore have a great hatred of the party.

2. My history is unclear, the social relations are complex, have been struggled in rebellion, censorship in rebellion or trial, or organized for having committed serious mistakes, and therefore dissatisfied with the party, 13 people, or 20.9 per cent.

Third, due to serious bourgeoisie individualism. Personal desires are not satisfied, and therefore discontent with the party and hatred, develop to the deformation of ideas, there are 25 people, accounting for 40.3%

This shows that it is not accidental that these people become right-wing elements. Some of the right-wing elements called "old party members" and "old cadres" have been contaminated with extremely serious bourgeoisie individualism, pursue fame status, be proud of complacency, are reluctant to accept Party education and supervision from the masses. Therefore, a former proletarian warrior has fallen into bourgeoisie The pawns, bourgeois right. These "old cadres", they once walked the path of the democratic

revolution with the party, and they did not go well. It is another matter, but, finally, it is not possible to cross the socialism threshold now. Not only do they have fundamental differences with the Party's policies and policies, but even openly oppose the party, and are in a completely hostile position with the party.

There is also a question here: Is anyone who exploits class family's intellectuals and individuals with individualism is the right? People with this weakness may turn to the right. The key lies in their own position. Do not accept reformations, have feelings for workers and farmers, and are willing to serve workers or farmers. The intellectuals were fighting against the right, some called the left, and the problem of position was resolved; some were called the right, anti-socialism in the bourgeoisie position; and most were centerists, and the problem of position was not fully resolved. As soon as the right attacks, when the clouds are shrouded, shake, it is affected and made mistakes. Why is the right rampant? It is a lot of reactionary words and deeds of the right, there is support, there is a market, that is, the center The main thing we fight against the right is the centrist. I'm not saying here that many of our comrades are centerist, but the fight against the right has taught us all. The main gains of our Ministry of Public Security in the anti-right struggle are to break down the right, exercise the masses, and have learned lessons. In the fight against the right, the vast majority of comrades performed well and stand firm. But some of the comrades made mistakes, were affected, their positions were not firm, shaken, unclear from the big deal, and did not see the conspiracy of the right. Comrades who have been shaken or have not wavered, have a clear attitude and defend the interests of the Party should think about it and learn from them. As public security cadres, regardless of party members, team members, non-party and non-party groups, there is only a patriotism stance. People's position is not enough, and there must be a class position, that is, to stabilize the proletarian position. Proletarian Love Not Patriotic? Of course patriotic. But patriotism alone does not necessarily have a proletarian stance. There are also classes among the people. Today, in addition to the bourgeois right, there is another part of the bourgeois also the people. They have contradictions with the proletariat, generally speaking within the people. The so-called position is to say that there must be a proletarian position. Party members should stand firm on the proletarian position, and members of the youth corps also stand on communism, because he is called the Communist Youth League. If there is no solution to this fundamental problem, if there is a wind, it will also shake, which is politics. Many of our comrades pay little attention to politics, there is no politics or no soul. Politics is a class struggle, the anti-right is a serious class struggle, with a socialist revolutionary class struggle. And many of our young comrades are good comrades, but as soon as the waves come, they stand unstable. All in all, in the eight years of liberation, after three major transformations, the five major movements have learned lessons, but they are not accepted. Most of the comrades signed on Wang Mingdi's reactionary article were good comrades, but why did anyone see their name missing and asked to fill it up? I think it doesn't seem glorious without her name, such a comrade would have to think very well about what is the position and feelings? This time the anti-right faction is to fight against the epidemic, and political resistance should always be a little stronger. Stand firm is to exercise, without exercise, stand will not be firm. Liu Shaotang, 21 years old, is completely cultivated by us. He is now the right, ungrateful, and all the benefits of the Communist Party have forgotten. No Communist

Party has Liu Shaotang? But he was actually anti-Communist. That's a mirror for us. Tian Yingzhen was originally a poor farmer and became a Chinese farmer after the land reform, he forgot his book. Comrades! These of us are not big intellectuals and small intellectuals. You say that I am also the landlord, when I started to participate in the revolution, was so firm? Not so firm. Social relations are not so simple, there are also several landowners, rich farmers relatives and friends. The Prime Minister also often said that his social relations were complex and that Taiwan had his relatives. So the fundamental thing is itself. Speak the position of those of us who have the prime minister firm? Speaking of anyone in his family who had been struggles and repression, the Prime Minister said that he had a relative who was still in the labour force. Comrade Deng Xiaoping said publicly at Tsinghua University that his family had been suppressed. So the problem depends on attitude, position. Do you go with the proletariat or the bourgeois? We exploitative class intellectuals who surrender to the proletariat by betraying the original class, surrender again, do not want to surrender, or to surrender in false. To truly and thoroughly surrender, it's called exercise. We join the party, which is also a wave of revolution, and of course there is a little subjective reason, dissatisfaction with the old society. But then a muddled mind, but one advantage over you is that there is a struggle, in a very serious war environment, and a workout. It is now a peaceful environment, a little worse, but exercise is not necessarily necessary for war. This anti-right struggle is even a good exercise. To fight to exercise, go to the masses to exercise, to work out in labor, to build industrial and peasant feelings, if it is true, not false, if it is natural, not reluctant; to understand that the world is created by the working people. The proletariat was the most promising class during the revolutionary period, although not culturally high and without its own intellectuals. It does not have its own intellectuals, but other classes of intellectuals serve him, as Marx, Engels, Lenin. The President said at the Third Plenary Session that we are also serving the working class. Why? Because conscious intellectuals have seen the bright and ambitious future of this class, see the law of social development. To figure out these, to be conscious, to work together with workers and farmers, have to make sense of mind, to stand in, really see what benefits they have. To exercise, take a humble attitude, do not think that reading a few books would be great. Reading a few books is easy, really to make yourself more aware, stand firm, serve the proletariat is not easy, to truly stand the exercise and test.

Workers and farmers and young intellectuals need to be well united

The Ministry of Public Security has some cadres of workers and farmers, and struggles have a long history; some are young intellectuals, struggles and exercises are quite different. The two parts have to be well united. This is also an issue of feelings for workers and farmers, and the unity of new and old cadres. To have feelings for old cadres, not about their problems, not to establish feelings with old cadres like Ye Tian, I only talk about the old cadres in general. There is a problem in this area of high hardship. For the old cadre, some people despise him, despise him, and hate him. Although there are problems with them, there may be many individuals, but they are not the right, they are loyal to the party for socialism. There is sometimes a little sentiment to the right, and it is not compatible with old cadres, or even hatred. This is both an emotional issue and a matter of position. Old cadres should be criticized for their shortcomings, but they should

start from unity and care, help them to rectify. To be comprehensive, they have experience, have been struggles, have been tested, and have a tradition of hard struggle. What is the reason to despise him, despise him, and hate him? They have good to learn, not to learn is always lost. So that can be united. Of course, old cadres also sometimes despise young cadres, always look at their shortcomings. They don't care enthusiastically about them and help them. This is also unreasonable. Young comrades should be enthusiastic to help love, and all comrades must have this consciousness, not only for our generation but also for the next. Young people are our hope, our successors. If the relationship is not good, old cadres should bear a little more responsibility. Both sides need to be proactive. Young people should not look at the shortcomings of old cadres. There may be shortcomings in old cadres, but the shortcomings may be relatively few, of course, the shortcomings of old cadres should not be forgiven. After fighting against the right, we should better unite together and learn from each other. Old cadres should learn something from young cadres, and young people should learn something in the old cadres. We oppose, but there are also a few comrades in the minds of comrades who are not so obedient in the minds of the right, and always feel that these people are not competent. This perception is inappropriate. Of course, there are a few who are not competent. You cannot conclude that old cadres are bad because they are all bad. They are all backward. Their times have passed and their historical mission has been completed, and now they should give way. This idea is wrong and dangerous. Instead, learn something in them, because their experience is more complete, stand firm, and they are more clear about whether or not. Similarly, old cadres have only the duty to care and help young cadres, and do not hate the power to exclude them. If so, he is also sectarianism. In this regard, it is important to ask more of the old cadres, to blame the old cadres. Relations are not good, and the first responsibility lies with the old cadres, because they are generally in leadership positions.

Young cadres should believe in the people and build feelings with workers and farmers. Young cadres also need to build feelings with workers and farmers, such as engaging in manual labour, closer to them, but only one way and more ways. To believe in working people, the proletariat is the most promising, they have less problems, and their ability to distinguish between right and wrong is better than us. Although many farmers have opinions about our party's work or some party organizations, some of the government's work and some cadres, the big deal is clear. The right is opposed to the Communist Party against socialism, and they do not agree. Ge Pei Qi's reactionary remarks, workers and farmers first oppose. Intellectuals want to go to the streets. The first thing against workers, farmers, and not youth intellectuals. A right-wing of the Normal University went to the street to put a big print newspaper. The first thing was against three round workers. He said, "You are not allowed to stick, and beat you!" Students from Nanjing University went to the Xinhua Daily, and the first thing against old cadres, workers, farmers and the public masses. An old lady slapped her slapped son, the old lady cursed him: "Forget Ben, the Communist Party wants you to read, you're still troubled, bastard!" Why is an old lady better than his son, and the old woman is a working people. Some of them heard that they were students of military academies, and that was old cadres. Also going to the street, anti-right, many people have a lot of gunshot eyes on their body. At school, you are wearing the People's Liberation Army clothes, and people's students are going to trouble,

how do you get miles! And they said, Look for plainclothes. Of course, in the end still persuade them not to go. After the incident, students from Nanjing University and Jiaotong University had to take off the school badge on the tram, because the working people knew they were posting big print newspapers on the streets. In that case, we have some comrades called cadres and intellectuals, but they cannot distinguish between big and big Africa, while farmers have little knowledge, even illiterate, and workers do not have so much knowledge, they just get a lot of knowledge. Our village cadres are not so good. The ordinary people have a lot of opinions about them, but you can't let them step down. Hanyang middle school students had trouble. Thousands of peasants had to fight with flat burdens, and the Party Committee did a lot of work before they persuaded them back. Some students in Nanjing surrounded the hostel of a PLA officer, saying he was corrupt. A group of construction workers spoke with them, saying that the salaries of PLA generals were taken according to the socialist principle of remuneration, and you could get a little more generals in the future. They said that people do not suffer hardship, you suffer? Who repaired the beautiful house at Nanjing University? We fix it. To suffer, race with us, see who suffers! A few right-wing, they ran away with their tail slippery. Some of these are well worth thinking about each of our young comrades. We should learn from these facts. Recognize and accept the lessons of this struggle correctly, stand firm, raise ideas and raise awareness.

Be red and specialized

Speaking of political and position issues, Chairman Mao, at the Third Plenary Session of the Third Central Committee, would find our cadres to be “red and special”. That is to say, our party should have a vast team of intellectuals. Either old cadres, or young cadres, should be determined to cheer up, work hard work and study well, so that within a few years, for example, ten years, we become a “red and special” cadre. The Red is about politics. Specialists are talking about business. Some comrades marched into science and made great achievements, but some one-sided, only studies business do not learn politics, the slogan is “red first”, “red does not matter” “first change” into an expert, and then dye color. This is wrong. Leaving the experts in politics is useless and we don't need it. Rightists attacked us, saying that the old cadres would eat with their old qualifications, not because of human nonsense, deserve attention. The old cadre red is a little bit, that is not exclusive. Red alone does not work, red is important, is the first place, but also dedicated. The young cadres are not yet specialized. There are not more specialised areas, but fewer. But the first thing to solve is to be red, that is, to talk about politics, without politics, there is no soul. It is not good, it is not a proletarian intellectuals, not proletarian experts, but bourgeois experts. Our existing intellectuals in China, basically bourgeois intellectuals, they are experts. Now we need to transform and strengthen politics, that is, to turn them into “red and special” experts, “red and special” cadres. Young comrades must first pay attention to politics, pay attention to positions. Speaking of politics, you can't talk about half red, pink, gray is not good, white is even worse. If it is a big red, five-star red flag is like red. In short, it is to have a firm stand, political awareness is high, specialize in business, learn a skill and serve politics. Old cadres have been tested by exercise, today there are many things that we are familiar with, are idle, unfamiliar things force us to do. The old cadre red has a little bit, that is, it is not exclusive. In the past, it is not someone called “million gold oil” can no longer solve the problem. This should be very careful. Is

there any other way to do it? No. It was said that the Chairman said he had to work hard, cheer up and learn. However, now there are a few cadres who are not interested in learning. That is, they feel like it would be enough to have a little red. Actually, it is not possible.

On the treatment of right-wing elements

What about the right? We can also discuss it. We have 62 right-wing parties here, what to do? There are so many right-wing groups in the country, such as ministers, directors, directors, directors, directors, heads of departments, heads of sections, directors and principals. All in all, there are quite a lot of long size! For example, is Rolongi and Zhang Bojun the same thing as ministers? Is our division chief, the head of section, the same as the Chief of Section? Also, we are mostly party members and team members here. Are we still members of the party or youth team? Today's report of Comrade Xiaoping has been announced in the newspaper. I heard that the right side saw it in a hurry, and there is no way to blame for it? Now no one can save anyone, nor God can save, but blame yourself as the right. Communists are always bad, are they? Because you Communist Party members want anti-Communist Party, it's not good! How many other anti-Communist and anti-socialist ones can be found in the Communist Party? Is it possible for the right to be in the Youth League? The Youth League is always a revolutionary corps and leftists. It is truly revolutionary! Or cry, or anything, I'm afraid there is no way for party membership, because party membership is not good to give human love, and the anti-Communist Party members are not allowed to do so. The Young Communist League is an assistant to the Party, and the right has become the assistant of Zhang Bojun. How can we do it in our Youth League? If you want to catch it up, be criminalized, killed or shot, then it will not be, generally the right will not, I'm afraid that the right-wing backbone will not either. Criminal sanctions, unless there is a revolutionary activity. The right is also a counter-revolutionary party, also an anti-revolutionary activity, that is, to engage in conspiracy, like the Hufeng anti-revolutionary group. The right was meant to reverse, to overthrow us, and to restore it. But we do not yet list them as counter-revolutionary activities like that, so criminal sanctions are not given. Of course, we can't say dead. We are not a procurator's office, nor a court, generally not to give. Party nationality is to be expelled, and the nationality is to be dismissed. Do some people still have the status of staff members in state organs? You can all think about it, I'm just asking questions. However, this can always be clearly stated, as long as they really bow their heads, really plead guilty, are willing to transform themselves, not engage in sabotage activities or agents. "Summer situation" has already been said above not to deprive them of their right to vote, and one thing is to eat, give them a certain job. Comrade Deng Xiaoping's report only said that the right, both inside and outside the party, should be dismissed by the Communist Party members, and members of the Communist Youth League should dismiss their registrations. Comrade Xiaoping also said in his report about the machine key departments. We are not a computer department here. Can we allow the right in the key department? Is it a criminal or administrative sanction for right-wing elements? Disciplinary or not? Is it dismissed or not? Is it the original salary, or is it a separate assignment of work, re-education through labor, or re-education through labour? It is already decided inside the Party, because the Third Plenum has been discussed. Is there any objection here, saying that the party membership of the right-wing elements should

not be dismissed, should be retained? If there was such an opinion, it could also be discussed. Probably won't have it, right?

The current task of the whole wind movement

The whole wind movement has gone two stages, the first stage is called Dashiming, and the second is called the anti-right struggle. According to the Third Plenary Session, the general organs and schools need to go through four stages: Daming; anti-right; rectification stage, which is to rectify the style and improve the work; and another stage is the stage of personal improvement. Each person needs to learn documents, raise their ideas, criticize themselves, and overcome individualism, liberalism, absolute egalitarianism, nationalism. Nationalism consists of two sides, great nationalism, local nationalism.

What we want to talk about today is the rectifying movement of our Ministry of Public Security. Under the current circumstances, we should move from the anti-right struggles to the third stage, which focuses on correcting the style and improving our work. This is the current task of our Ministry of Public Security. Comrade Xiaoping spoke about eight issues, and the last one is to improve his work and strive for a full victory. The rectifying movement simply reversed the right without improving the work and rectifying the style. This is not a full victory. The right has also fallen, the work has improved, the style has also been rectified, this is called full victory. It is good for the anti-right parties, or rectification, everyone needs to be educated, not isolated, not separated. So the Ministry of Public Security has to move to the third stage, it will not be good if it doesn't turn. The central government said that it should turn in due time, the right will turn, called early, opposite almost, not turn, it's called late. Our anti-right struggle was discussed by the party group, 80% pleaded guilty, all the backbone elements were down, the mass consciousness was raised and the boundaries drawn. This is the standard that can be transferred to the third stage, is timely, so now we want to turn.

The main frontiers of the rectification struggle are three, that is bureaucracy, sectarianism, and subjectivity. If the main frontier of the struggle in the previous stage is the right, the struggle against me, the contradictory enemy, and class struggle, then the third stage is to engage in trialism, is an internal problem. The trialist account should also be hung on the bourgeois, because it's something of the bourgeoisie, not the proletarian thing. It's the bourgeoisie thing. Why is it in the proletarian team? That is, the proletarian team was affected by its erosion, so we now put these things off and disinfect these things by the way of the whole wind. When the previous paragraph was magnified, we made a lot of criticism on the trialism, put forward a lot of opinions to improve the work, a total of 2470 opinions. Most of these opinions are good, some are not necessarily completely correct, and they are also more skewed, as long as they are not right, they are not correct, more exaggerated, some are more bitter, that does not matter, and will also be useful for improving the work. You have revealed more problems than we know and are much more serious than we think.

For several years, the Ministry's isolation from the masses, from actual bureaucracy, sectarianism, and subjectivity has been quite serious. Although some struggles have been made against these things over the years, some have been overcome, but not enough, new things have grown up. For us, the right side is dangerous. If the three majorities do not overcome, we will make our party out of the masses and out of reality, our party will be

bureaucratic, and socialism will not be done. We say that the Communist Party will not die, it is not to say that the three major principles will not overcome or die, saying that the Communist Party will not die, which means that he can promptly reveal and correct mistakes and shortcomings in a timely manner. Of course, the Communist Party is fundamentally likely to expose and overcome its own mistakes. Criticism of mistakes and correcting them is the principle difference between the Communist Party and other capitalist parties.

The more prominent problems of the Ministry of Public Security generally have the following aspects:

First, leading cadres are out of the masses. This phenomenon is very serious. Leadership cadres at all levels, especially at the level of ministers and vice-ministers, have too little contact with the masses. We don't know very much about what people think about, hate what they want, what they oppose, what are the requirements, what are the state of mind, how are they learning, work and life, and a series of problems in learning, work and life. There is a gap. In addition, some leading cadres are proud of complacency and complacency, they think that there is something different from the masses to discuss, sometimes their attitude is very bad; some leadership cadres have a large bureaucratic shelf, and the masses cannot be approached. Trainee people without moving, very arbitrary, the masses are always wrong, and they do not personally do it. Many things do not do, automatic mouth, moving mouth is also very simple, there is no moving brain. Someone criticized me the shelf is also great. Is it also a little shelf? is very worthy of my attention. In addition, some leaders are not democratic and have no democratic habit, that is, you want to listen to us, I can't listen to you. I say, treating my own subordinates is not treated equally, comrades live together, but very strict boundaries. Such as listening to reports, watching drama and evening party here will be graded, out of the masses, special. Of course, the main thing is not these trivial things. The main thing is that the leadership and the masses are united, everyone has a sense of mind, intimate, there is something that dare to say, as in the "summer situation" said: both democracy and concentration, both freedom and discipline, there is a unified will, and there is a comfortable mood of the individual, life lively, intimate, nothing Distraction, leadership and masses into a piece. Are two hearts? That is not either. Everyone is the heart of the revolution, the heart of the Communist Party, the heart of socialism. But it's a big principle, after all. How to strengthen the leadership of the Communist Party, how to put socialism well, how to do the work of the Ministry of Public Security, everyone takes responsibility and brings together all the wisdom. That still has to be done a lot of effort. Why not that? That is, there are bureaucracy, subjectivity, sectarianism in leadership. Leading cadres do not care much about the young comrades, and do not understand that they also have many strengths, so that the masses can create everything and their personal role is very small. It is up to the efforts of comrades from the Ministry of Public Security to make public security work well. Some leading cadres have problems unconsciously, some consciously do not correct them, and some do not know them yet, but everyone can see it very clearly. Second, there are still many problems with the institutional system, impractical and unreasonable, some of the original good, now wrong; some should be changed or not changed; some are due to the lack of experience in the past, they are in the process of searching, but now have more experience, that is, old and unwilling. Institutions overlap,

people float, travel on official documents, work efficiency is low, and the division of labour is inappropriate. In institutional terms, those under the supervision of the Ministry of Public Security, those under the authority of the Public Security Department and the Bureau. There are many problems, confusion, and even contradictions. The paper says this one today, another one in a few days to say that, it is contradictory. Documents travel, procrastination, very simple things are solved by a phone call, drag a few months, some simply forget, do not deal with it. The work is poorly organized, many comrades are busy and many are idle. There are two reasons for idle, one is nothing, one is that some comrades isolationism, only believe they do not believe in people. People's motivation is not organized and played.

Third, the ideological work is weak, and the work of cadres is a lot of problems. Many leading cadres often fall into the circle of affairs and live in the file heap. As for cadre thinking, I don't know that if the cadre's minds are not strong, their ideological positions are not consolidated, socialism does not go to occupation, capitalism is going to occupy. Do not understand these truths, or do not fully understand or understand not profoundly. There are many problems with the work of cadres. Some people have been influenced by the bourgeois, metamorphosis, and some strata dispersed his stuff here, and we don't notice it. Our political organs have done a lot, and one of the features of this right-wing attack is the attack on political institutions. Then we firmly oppose. But the ideological work and cadre work of political organs are caused by many problems and shortcomings, or even more serious shortcomings, and it is bad anyway. And ideological work is not only a matter for political organs, it is a matter for all cadres, especially leading cadres. It is not enough to rely on political organs alone. Whether the Party is not enough to organize and manage it seriously, it is also worth considering.

There are still problems with the preparation. Today it seems that the past has been blind. Past ideas are inappropriate and unrealistic. The following cadres have moved from the center too much, so that some cadres cannot be assigned their work for a long time. It is not enough to help young cadres in general. Of course, a person's progressive affairs depend on his own, but external help is also important, not giving them some way, creating conditions that will allow them to exercise. In this way, a small number of young cadres who are not determined will hurt them, stay in the leadership organs for a long time, take pride in complacency and take pride in doing so.

Fourth, the administrative work and welfare of the organs have many problems and shortcomings in the past. Almost every party congress or congress of the delegation has a lot of views. Some of the problems of life of the masses should be solved, not resolved, and in many places there are unfairness. For example, welfare fees should not be paid enough care, they should not receive them. They also suffered deception from bad guys. They bought a tricycle with welfare fees. They asked their grandfather to pedal three rounds in the morning and rent it in the afternoon. Where is it approved? So unreasonable! You can expose that everyone comes up and says it works. In the past, public security hospitals have made exposures on some cadres, although some of them are inappropriate and exaggerated, they are not completely exaggerated. In short, this aspect is specialization. It is not simply a few welfare fees, but it is not to get away from the masses and do not honor. Some people have more children and families are burdensome and should be taken care of. But more children will eat a little bitter. Who calls you so much?

Can not take care of too well. I was also a mistake. Children have no consciousness, make mistakes to have consciousness, do not make any more. Aren't we already 600 million people? Add a little less! In addition, work hard, tailoring, hard work, hard work, hard work. But it is always neither aware nor diligent to hold a family, and do not want a way, that is, reach out to the country and want to be unreasonable, this is not good.

More than 2,400 opinions were put forward in the last release, but there are no more than 2,400, probably thousands, 10,000, tens of thousands, 100,000. Because then quickly turned into the anti-right struggle. That is, more than 2,400 have been mentioned, because they are busy with the anti-right, just changed a little, and are all of a transactional nature, such as living welfare, living system, house problems, canteens, and so on. So, many of the things that should be improved are not too late to change. The anti-right struggle has now been won, creating favorable conditions for rectification.

Resolutely put, boldly put, thoroughly put

In order to carry out the rectification in a systematic manner, we have dedicated a stage, which was decided by the Party Central Committee, and we should firmly implement the decision of the Party. So we want to continue to make a big voice, the slogan is: resolutely put, boldly put, completely change, and to this end we must be resolutely put, boldly put, and completely change.

However, there are many comrades who do not understand why they want to enlarge? In the past, it was originally intended to remove the three doctrines, and put it out of the right. That's good, too. We are anti-right. If the political direction of anti-right-wing parties cannot be correct, the level of thought cannot be improved, and the majority of cadres cannot unite, of course, not conducive to the cause of socialism. Now that the fight against the right has been decisively won, so continue with the wind and magnify. So in the third stage, a new climax will be set off, that is, to rectify the work and improve the climax of the style. How to messing up? Do you want anti-right? This stage of trialism, the right will continue to counteract if there is no opposite. The third stage focuses on reorganizing the style. Improve the work, focusing on criticism of the trialism of leadership. For public security work, the question before us now is to do the job a little better, or do it a little worse, or is it a little better for the Party's tasks? Are we promoting department or retreat? If you don't want to get things broken, but to get things done well, then, everyone will have to get rid of the trialism. Without reversing it, it is very likely that it will become a retreat and promote the work of public security. If so, in favor of whom. Who is happy, there is no need to explain. Therefore, we ask everyone to expose and criticize the shortcomings and mistakes of the leadership of the Ministry of Public Security, and put forward proposals for improving leadership, improving work and improving style at three levels of leading cadres at all levels of special departments, bureaux and departments.

What is the main content of this time? What opinions are there, from policy and policy to specific work issues, from ministers and deputy ministers to every comrade, and leading cadres in particular, can criticize and give opinions. Depending on our situation, the third stage can focus on the following issues: the first leadership and the people's relations, the second institutional issues, the work of the third cadre, and the welfare of the fourth life. First of all, look at the situation from that question, I'm afraid that matters lead relations with the masses, the institutional system problems are a little more, and you can start

from here first. Second, cadre work, welfare work, the work of the Party, the work of the regiment, the work of the administration, and so on. There can be a variety of forms, you can group meetings, symposiums, debates, letters, conversations, so-called small print - "wind dynamics" continue out, all good articles are published, according to the situation a few days, one issue a day, two times a day. And most importantly, the big print, as the main form. I heard that some people were not interested in the big print newspaper and didn't understand its benefits, and I didn't know too much in the past. The downside of the second stage is that there is no big print, only a few. Comrade Xiaoping said in the report of the Third Plenary Session that the big print should be turned into a regular form of criticism and self-criticism. Chairman Mao made a very important comment on Daming, big debate and big print newspaper. He said this is the best form of today's revolutionary struggle. It was created by the masses for what we are looking for, and found today, this is the broadest and most democratic masses route. Big print is clear, lively, direct, public. The stubborn bureaucratic, not afraid of anything else, will be afraid to post a big print. If one does not work, two, up to 10,000, the chairman will pass it down. Although our party has many shortcomings, it has a democratic tradition that dares to accept this form. We also informed the people of the capitalist embassy to go to the big print. Foreign countries have also seen, saying that the Chinese Communist Party does not mean that it is impossible to do so, but on the contrary, has shown consolidation and strength. Now the big print opinion is of world significance. People's Daily has an article called "Long live the big print". The article cited workers a word to sing to the big print:

"Big print newspapers, big print newspapers, your benefits are really quite a lot. In the past, if they were to give opinions, only a few people know that to give advice to leaders, it may not be passed in a few days; when the whole wind has a big print, the criticism will immediately know. Opinions, big and small, public criticism is not conscientious, to help the windy newspaper, your credit is no small." We're in the third stage, the big print is free to come out. Individuals, groups out, party groups out, general cadres out, leading cadres out; can say yes to people, can be opposed, can be debated, discussed, can criticize themselves, you can counter criticism, can suggest, and can propose proposals. In short, democracy is fully pursued, the superiority of the masses line is fully exploited, so that justice can be flamed. The meeting today is to put a fire of trialism. Can you not write a name in the big print? Yes. We don't advocate this, but some comrades have concerns, what is the way to do it? Signature is OK, no signature, real name, kana, no restrictions. And the scope is posted in the Ministry of Public Security. Another point is that it has already been said last time, the secret of the work should not be posted in large print, mainly against the enemy struggle, opinions related to this area can write letters, you can talk to the party group, direct leader or related people, and the small print — "wind dynamics" is not published. In addition, there is a suggestion that does not count as a limitation. It is a large print that is a general relationship between men and women, or it may dilute political significance and may lead the struggle to unhealthy, even vulgar direction, in the wrong direction. Such problems were not tolerant, but rather addressed by other means. As for very serious special very bad ones such as hitting wives, insulting women, deception, violation of marriage laws, etc., my lord posted, no matter who he is. A party member, revolutionary cadre, and moral degradation is not like words, is to announce the public and force him to rectify it by using the power of the masses.

In addition, can opinions be sharp? Can I be ironic? The sharper, the better, it can also be ironic. Can I be ugly? If you proceed from the desire to unity, do not plan. Sharp, irony is not equal to ugly. Sharp will be one-sided? Possibility one-sided. Because the big print is clear, direct and open, it is impossible to write the same way as writing an article, the big print only speaks about the shortcomings, and does not speak about your lack of achievement or merit. If 100 opinions have a correct one, if 50% correct croak, one is not correct, and there is no harm. Because the meaning is good, it's just that the situation is not clear, there is no right opinion on the problem, there is a misunderstanding, and cannot be blamed. Unlike the right, the right is fabricating rumors: they will bring us down and be restored. As for their comrades, you can tolerate

Can you put it up? Should sound up. Because there are many shortcomings and mistakes objectively, revealing how love the masses are exposed. Subjectively after anti-right-wing struggle, everyone's awareness has increased and more intolerable about trialism. In addition, our party and team members are many, and we should take the lead in opposing trialism. So it should be able to put it up. But there may be concerns from two sides: on the one hand leading cadres have concerns; on the other hand, general comrades also have concerns. So here's another dare to flout. Dare not big debate, dare not dare to engage in the big print issue. To the previous big song magnified. Some comrades dared, afraid of mess. Central said it will not mess up, the bigger the larger the more will not mess, out of a little messy. Avoid mess. Now it turns out that the center is right. Now again dare the problem. Chairman Mao's instructions, Comrade Xiaoping's report all speak of bold and bold change. This is to dare.

Leading cadres should not be afraid, believe in the majority of the masses, and also believe in themselves

Leadership comrades have concerns and understandable. Because anti-trialism is not anti-Wang Mingdi, nor is it an anti-Wang Lun Tang and Li Zhongxiu, but against the shortcomings and mistakes of our leaders. Who set fire? Burning our leaders, the fire is a good fire, not bad, the more healthy it burns, the more healthy, it is not bad. Why is the grandmonkey powerful? That is, he took up exercise, that is, the old Jun rehearsed him into the alchemy furnace and burned him for 777 and 49 days, so all aspects are strong. With Tang monk, monk beat him does not win. Our big print is a little better than the old man's stove. What are you afraid of such a good thing? Keep the problem up well, or burn it off? So don't have concerns. Leaders are afraid to hurt face, make mistakes face is not so nice. Now a large print can solve the problem, keep it up, and in the future, it will hurt a big face. Fear of loss of prestige, is not right. With mistakes, big print help you, correct mistakes, are there more or less prestige? Or is it higher or lower? Preserve the error with prestige, or is it more prestige after correction? Fear of losing face, prestige, there is no reason. There are others who want to hide the shortcomings, mistakes, I changed myself. Why should I still paste the big print? How can I hide a mistake? Concealment is not the way. Another way, is to resist, that is not to accept, you criticize me, I will counter criticism, you post one, I will post two. That's not a way. Everyone has eyes, who is not everyone can see very clearly. We have advised comrades before, don't feel like a tiger's ass. To make a declaration, not the butt of the tiger, to ask people to touch. The Communist Party is not even afraid of imperialism. Your tiger's ass is so afraid? So there is no reason for leading comrades to have these concerns. As for fear of collapse, in

general, I can't fail, believe that you are referring to this. So also do not be afraid. If it is very serious, it will collapse, and maybe it will climb up. The proverb says "the sky rains down, fall their own climb, climb up, can not climb up you again climb". If you do not admit mistakes, do not ask people to enlarge, and don't ask people to post big print newspapers, your station will not break? I'm afraid it's a little more powerful, and may never climb up. If your station has been a bit shaken, then, after the big enlarged, we help correct the error, may be consolidated. In the past, the Yellow River iron bridge shaken and shaken, long said it had expired. Soviet experts suggested "reinforcement", and now heard that it could be used for many years. Some of our comrades have more serious mistakes and shortcomings. In fact, they are almost identical to the Yellow River Iron Bridge, shake and shake, think of a way to do that? The way is to wind, make a big bang, take the masses line, let everyone help you correct the errors and shortcomings, then you can "strengthen". So, this is a great thing, be sure to take a welcome attitude.

General cadres to break the "four fear" throw away the "three excuses"

As for the general comrades are said to have four fears. First, is to be afraid of a big song, put the wrong thing in the future as the right, what to do? This concern should be broken. The right-wing is by specification, which is the six criteria that Chairman Mao said. A few mistakes must not become the right. Opposing trialism does not contradict these six standards, sometimes at all, and does not undermine this standard, and cannot be counted as the right. Perhaps some people say, you now say again, either a person out of the big print, or a few people out, negotiation, sharp or ironic. The last time you made a great mobilization, you also talked about this set. After the results said, they will engage the right, will they still be anti-right in the future? This time, the two areas of the problem of the anti-right fundamentals were magnified. Comrades! The last time we also wanted to put the wind, the result of the cattle ghosts are out, what is the way? If he meets six criteria, not the right, then our words are spiritual. For example, in the context of the whole wind, it is necessary to apply the principle of "unspoken, indefinite words, innocence of the person, the word is not guilty, and others will be changed, no encouragement" is not allowed to apply this principle. So why don't there be right-wing practices this principle? For he is the right and the enemy. How do he do it? Because they are guilty, it is certainly not possible to "hear the word" and "change it". The right wants us to change the leadership of the Communist Party and change the socialist system. Do we not change it? There is no need to be afraid of the formula of "unite — criticize — unite" to resolve the contradictions within the people. If you are exposed to some errors in the first place, there is no harm, check in the fourth stage to resolve it. Wrong in the brain, it is better to put under the sun, announced for everyone to see, is also an exercise! But this is different from the right and cannot be confused. And it has been proven that some comrades in the last revelation were not so correct, wrong, biased, one-sided, some were untrue, some were even influenced by the right, and were not entirely goodwill. For people like that, we cannot treat him as the right because he is simply saying that there is a wrong opinion. To illustrate the problem, let me give a few examples. There was a comrade Jin Can, and I talked to him once. His article was published on the "whole wind dynamics", and later, someone criticized him, he also did some reviews. He was in the anti-right, should be said to be a man in our team, good comrades, but his first article (at the party panel discussion) was There are serious mistakes, you can turn it over. His

words are very bad words, very wrong words Jin Chan is not the right, and his remarks cannot be right-wing speech either. There are some he has reviewed and some have not reviewed yet. I suggest Comrade Jin Can check in the fourth stage, improve himself and get a lesson. In addition, some observations in the third stage can also be mentioned. There is also Comrade Du Wenrong, who proposed the “four principles” of the so-called cadre policy, is not now classified as the right. That thing is wrong. There are also comrades who have made very biased opinions about leading cadres, even exaggerated, and we have not classified them as the right. There are also public security academies about a person, and some people say that this person must be the right. We say not only is not the right, some opinions are still good. In addition, on issues such as anti-town, counteraction, cadre policy and leadership, there are false arguments, biased opinions, and even a few individual motives are impure. We have not classified them as the right because they are not the right, they are good comrades with flaws or mistakes. So there has been evidence that this concern should not be there. Sharp or ironic, as long as it is not malicious, including some impure motives, and mistakes also belong to the nature of some mistakes. It would be impossible if anyone could use the anti-right to turn such comrades into the right.

Second, fear of retaliation. There may also be reprisals, and fear is not entirely unjustified. The first is not afraid, the second is not terrible. When a person is not correct to think, he blows people and revenge against them, but he is not legal; not only is it incompatible with the party law, it is also unconstitutional, and the regulations on rewards and penalties announced by the State Council are not allowed to combat retaliation. So this illegal thing, don't be afraid. As for whether there has been any retaliation since the whole wind anti-right, according to Li Zhongxiu said that the fight against retaliation is a variety of styles. The nature of this proves to be completely Cali, and some things are fabricating rumors in person. He said that Minister Zhou Fu had a mustache, a big belly and so on. When did Minister Zhou Xingfu flow through the word Hu? He made a rumour in order to stigmatize. And say what all people are crying! If there is, everyone can post a big print, there is a reprisal that can complain, others can fight against them, they can denounce them, all the time to the central government. Anyone who engages in reprisals, no matter how high his seat is, firmly opposes, and will be punished. People give their opinion, they give “wearing small shoes”, such people always want to collapse, so don't be afraid either.

Third, afraid to mention no change. This is an old opinion. This matter has been determined, because Chairman Mao of the Party Central Committee has all made determination and must be changed. If it does not change, he is forced to change, and he can post 10,000 large print newspapers. So don't be afraid of this either. We have not changed much in the past, but a little bit, which also shows determination. Some measures have now been taken to make a special effort to rectify, and a group has been set up for advice, under the responsibility of Comrade Wang Jinxiang. A few more groups will be set up in the future. First of all, more than 2,400 opinions will be made available to you. Those who have changed, those who are ready to change, those who cannot change, also need to be made clear. The bureaux should also do this, and each one must be given.

Fourth, fear of leadership mistrust. I think that makes sense, but it doesn't have to. Generally speaking, real leaders do things in accordance with the principles of the party. Leaders should be fair. They should take a positive attitude towards a member of the

Communist Party, youth corps, revolutionary cadres, and cadres of state organs to correct mistakes and shortcomings, although opinions are not correct enough, they should be more trustworthy. Trust in Vivino's people can be a little bit worse. From the whole wind movement until now, there are individual comrades who seem to “do not matter yourself, hang up high”, do not express opinions, do not express their attitude, neither approve nor object, “Xu Shu Jin Cao Ying said no words”. How can such comrades gain trust? As for those leaders, that is, like what he says, what others say, is called obedient to Vivino, and a little more opinion is called disobedient. This is not a good leader, it's bad leadership. It cannot be said that there is no such one among our leaders. For such bad leaders, they can also trust them. For a member of the Communist Party, youth corps, and revolutionary cadres, as long as they gain the trust of the Party, the trust of the people, is the greatest comfort, and not to cater to the trust of the bad leadership. Catering to bad leaders called to believe, that is, they made mistakes.

In addition to four fear there are three excuses. The first is to consider less speaking more, the second is to suggest less criticism, and the second is more support for less opposition. This can also be described as “thoughtful”. Such people have learned the method of Zhang Naiji. Zhang Nai-Deng is said to have advocated 3 to “suggest less call” to Chiang Kai-shek, and “more support less against”. These so-called thoughtful considerations of our comrades are of course different in nature from Zhang, but these comrades also have some minds. Think more about it is possible, do not blurb out, but do not be older than the world, old rape and crafty, that is not much considered. Half a hundred life, is not old, “people to 55, is out of the mountain”, tiger not out of the mountain is not old, young comrades are so old, old rape and crafty? It is not good to speak less, to speak more, more suggestions are right, less criticism is wrong. Suggestions to have, and criticism, criticism should be criticized, should not be less, and you should not criticize, that is, more, you should not criticize, you should not criticize, that is, you should not criticize, that's not right. There is no standard, no principle, no stand. “More support” do wrong you also support, there is no right, no principle. The right one should be upheld, and whoever is wrong must be resolutely opposed. And there is a fear that criticizing the leaders has blow their prestige? If there are such concerns, it is not right. Generally speaking, old cadres have been tested, experience is more complete, their position is more firm, is clear, and the Party has feelings about socialism towards the working people, but it is not without problems. Three doctrine is mainly manifested in leading cadres and old cadres.

Therefore, on the one hand, you should care for old cadres and learn from them, but on the other hand they must also criticize their mistakes, fight firmly against their mistakes and expose thoroughly, this is also to care for them. If you take a good attitude that you are an old cadre, it would harm these people instead. This concern should not be there either. Criticism about the problems of old cadres and must fight resolutely, not to be sorry for them, it is just to care for them, and more importantly for the cause of the Party, for the cause of the people, for the cause of socialism.

Therefore, whether it is leading cadres or young comrades, these fears, these concerns are unreasonable, and should be broken and can be broken. Think of these questions should not be afraid. The most terrible thing is that our party is out of the masses, that's dangerous. Every member of the Communist Party, a member of the youth corps, and a cadre of the revolution should be afraid of this. There is also a fear that the party is not

strong, there is no strong sense of responsibility for the cause of the Party, the cause of the revolution, the cause of the country, the cause of socialism. Individuals intend to fear that they have suffered losses in this struggle, see mistakes do not speak, see bureaucracy, sectarianism, subjectivity do not oppose. For Communist Party members, this is called not strong party nature, and for the revolutionary cadres, a lack of responsibility, and the cause of the Party. The cause of the revolution, the socialist cause is irresponsible.

Leading cadres are afraid to make opinions, lose their prestige, lose their face, lose their status, only pay attention to personal gains and losses, and are not willing to disclose their mistakes to others. This is also a lack of awareness, putting personal interests above the interests of the Party. This is called no politics, no stand, and decadent liberalism.

Mobilize, get active, unite, bury the trianism, fight for the whole windy movement to win all!

Want to attack three, do you attack people or attack? This cannot be completely separated. Because things are done by people, you can contact people with things, or people can contact things. The method is still the big print, put the truth and make big arguments. Therefore, according to the guidelines of the Central Committee of the Ministry of Public Security and the Party Committee, Comrade Xiaoping's report, we should continue to keep the wind up. Burn all three doctrines and buried them all. We call on everyone to mobilize, unite and work together, in accordance with the instructions of the Central Committee, to seriously rectify the style, improve the work, and win the whole windy movement!
