

Instead of focusing on national livelihood and cultural education, the government and the leaders of a ruling party are engaged in “masculine plots”, tricky ordinary people, “lure enemies deep and gather together”, and beat countless innocent intellectuals and cadres of party members and cadres of the patriotic love and love leaders into enemies of the people. What kind of brutal malevolence is this? What kind of downstream shameless? Have China and abroad seen such political parties, such governments, such leaders in ancient times? Therefore, Mao Zedong and his anti-right efforts should both be treated as “traitors to the country”! They shall cast their kneeling statues with pig iron, and put them in Tiananmen Square, and let the children and grandchildren scold!

What **do right-wing elements know?**

Wuyi San/Editor

What do right-wing elements know? Actually still “I don't know”! One reason for “unknown” is that data is blocked and expired files are not decrypted.

September 23, 1959, Xinhua News Agency “Internal Reference” reported that 463,812 right-wing elements (excluding the military system) were revealed nationwide. Of these, 42,714 members of the Communist Party.

Now the popular argument is 552,973, referred to as “550,000”, which comes from the sum of the two, the number of “rectified” by the CCP authorities in 1978 — 552,877 (a wave of review of certain major decisions and practices 1991), plus 96 right-wing elements (Zhang Bojun, Lorongi, Reserve) Anping, Peng Wenying, Chen Renbing, etc.) That is $552,877 + 96 = 552,973$. However, until now, the anti-right movement remains highly sensitive and information remains confidential, and all local histories and departments are unclear or even absent from reference to the anti-right movement. Second, there are too many varieties, different standards, can not accumulate.

At present, according to provincial data, there are 586,430 right-wing elements (lack of central authorities, military system, Tibet Autonomous Region figures) — in addition to a significant number of center-right elements, suspected right, “file right” (also known as the “pochet right”, because of a lesser degree, are classified as the right but not disclosed. Internal control), right-leaning, anti-socialist, localist (Mao Zedong said that localists are also the right) workers and farmers have been renamed as anti-revolutionaries, “bad,” “anti-socialists,” and “anti-socialists,” who are treated the same (persecuted, discriminated against, forced labor reformed). For example, there are 4,584 center-right elements in Fujian Province, 7,500 anti-socialists in Anhui Province, 60,000 center-right elements in Sichuan Province, 4,445 center-right and 1,816 anti-socialists in Yunnan Province, 9,000 others in Henan Province, all around, and the total victims may reach hundreds million. This figure of 3.1 million appeared several times in the “Yan Huang Chunqiu” publicly released in mainland China. The official did not deny it, and did not acknowledge it, is considered to be acquiescence?

I. Central authorities

As of 20 July 1957, 2,517 right-wing elements were discharged out of 61 units in the central state organs. 1.43 per cent of the total. (Report on the Work of the Party Committee of the Central State Organ 1957.25) Even the initial figure, according to
